

# Caspofungin

**Powder for concentrate for solution for infusion**

- 50 mg/vial
- 70 mg/vial

**Caspofungin is a new class of echinocandin antifungal agent with broad spectrum of activity used to treat a variety of fungal infections**

## INDICATIONS

- Treatment of invasive candidiasis in adult and pediatric patients.
- Treatment of invasive aspergillosis in adult and pediatric patients who are refractory to or intolerant of amphotericin B, lipid formulations of amphotericin B and itraconazole.
- Empirical therapy for presumed fungal infections (such as Candida or Aspergillus) in febrile, neutropenic adult or pediatric patients.
- COVID-19 associated invasive candidiasis.

## ADVANTAGES

The advantages of the echinocandins include less toxicity, broad-spectrum activity, and synergistic effect in combination therapy.

**Pharmacotherapeutic group:** Other antimycotics for systemic use

**ATC code:** J02AX04

**Storage condition:** Store at 2 – 8 °C.
