A GMP and ISO 9001: 2015 certified company

VISION

Atlanto Enterprises LLP have endeavored into the business of manufacturing Spares, Sieves and Screens for pharmaceutical Industry.

MISSION

Precision and innovation with utilization of the latest technical advancements are the fundamentals of Atlanto Enterprises LLP. We are in constant urge of providing the same in the most cost effective way to our customers.

VALUES

Understanding the needs of our customer, 'YOU' is the utmost priority at Atlanto Enterprises LLP. We implement the contemporary technology for the betterment of the existing processes and constantly strive to make our products more suitable for the probable upgrades so as to be sustainable and cost effective for you; after all, a rupee saved, is a rupee earned!

ABOUT US

Atlanto LLP - with the motto of 'providing best quality products at reasonable prices and optimum after sales service', continues to surprise with new to newer innovations at optimizing growth.

With this motto, we have been serving the pharmaceutical industry since the last 43 years and are pioneers of many innovative products, such as static current passable sieve (S.C.P.S.™) suitable for sifter and Z Type sifter machines. Having developed a Z shape sieve in moulded design and stainless steel frame with Epoxy coating, we set forth in developing an ultrasonic sieve for ULTRASONIC sifter machines.

Our Product list includes screens for Multimill, Cadmill, Cizermill, Clitmill, Turbo Sifter cum Multimill, Oscillating Granulator, Comill Screens from 0.1 mm Hole Diameter to 25 mm Hole Diameter size, below 0.5 mm and odd size perforation; square perforation is achieved by S.L.E. Technology (Synchronise Laser Etching). All the screens are also available in Spherical Grater and Triangular Grater; complete sets of certificates for both, sieves and screens available.

A comprehensive infrastructure to cater and serve our reputed clients, our office is well equipped and so is our factory's acclaimed quality control department, helping us achieve a 100% in-house manufacturing of all our products.

Atlanto LLP is a GMP & ISO Certified company.

Striving constantly to perfection, it is a pleasure to serve you. Do contact us with your queries from our vast array of product list and beyond. Innovating always...

FLUID BED DRYER (FBD) SIEVES

These are available in various sizes from 30kgs to 300 kgs, sieves used are dutch woven screen, hollender screen, the most common sieve used is 24 x 110 mesh. When the particle size is less than 30 x 150 mesh and 40 x 200 mesh are used. Round cut sieve, sieve with stainless steel cladding and silicon moulded is also available. Also available in a special Static Current Passable Sieve S.C.P.S.™ No: 3028589 & 3028590 Special Triangular Grater (TG) screen. Available with a complete set of certificates.

FBE DRYER SIEVES

These are available in various sizes from 25 Litres to 1300 Litres, sieves used are dutch woven screen & hollender screen. The most common sieve used is 30 x 150 mesh. Sometimes depending on the particle sizes 24 x 110 mesh and 40 x 200 mesh is used. Round cut sieve is available and the option of silicon moulded is also available. Also available is special Static Current Passable Sieve S.C.P.S.™ No: 3028589 & 3028590. Special Triangular Grater (TG) screen is also available for wurster coaters with centre holes. Available with a complete set of certificates.

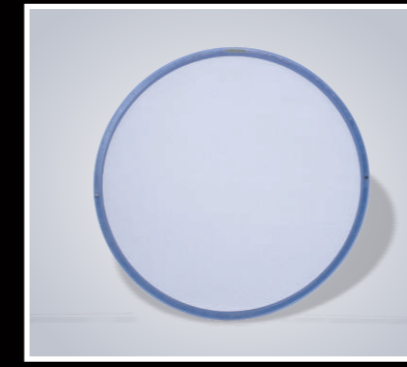

WIRE MESH

These are available in various sizes from 2 mesh to 600 mesh upto 10 microns. Different widths are available as per requirement, the most common width is 1 meter & 1.2 meters. Available with a complete set of certificates.

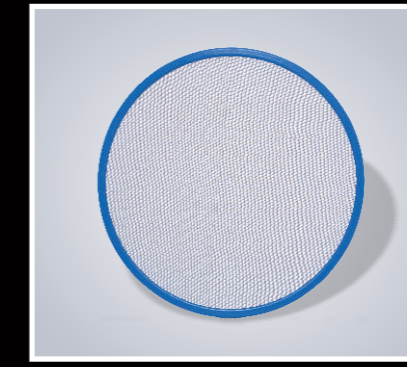

We also manufacture Filter Cloth and Demister Pads.

OUR PRODUCTS

SILICON MOULDED SIFTER SIEVES

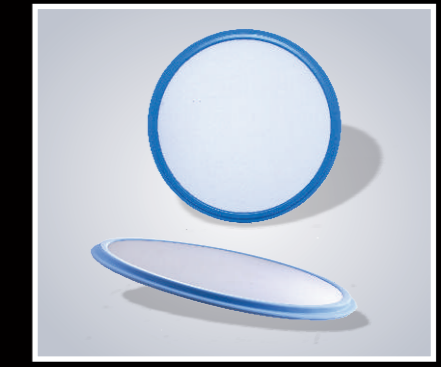

These are available in various sizes from 12" to 60" diameter. The most common sizes used are 20" diameter (550mm) & 30" diameter (750mm). The silicon which is of food grade quality, transparent in appearance, non toxic is moulded on the stainless steel ring, which is riveted with the wire mesh. The mesh sizes vary from 04 mesh to 500 mesh Opening available with as per A.S.T.M. standard available with a complete set of certificates.

SPECIAL STATIC CURRENT PASSABLE SIEVE

(S.C.P.S.)™ No:3028589 & 3028590

These special sieves are developed to dissipate static charge developed during the sifting process. Available from 12" diameter to 60" diameter in normal and 'Z' shaped from 04 mesh to 500 mesh with a complete set of certificates.

Z TYPE SIFTER SIEVE

These Sieves are available in silicon moulded, as well as in stainless steel frame from 20" diameter to 60" diameter, also in special static current passable Sieve S.C.P.S.™ No: 3028589 & 3028590 from 04 mesh to 500 mesh with a complete set of certificates.

ADVANCED SIEVES AND PERFORATED SCREENS TESTING KIT

Sieves and Screen Testing Kit is available with Densimeters, PIC Gauge, 8X Magnifier with Scale, 50X Pen Microscope with Scale, 30X Magnifier with Torch, Go. No-Go Gauge, 90X Digital Microscope with special measuring software with a complete set of certificates.

PRECISION PEN MICROSCOPE
LEAST COUNT - 20 MICRONS

8X CALIBRATOR WITH SCALE :
0 TO 10 MM WITH LEAST COUNT
OF 0.1 MM FOR VERIFICATION
OF NOMINAL APERTURE

NOMINAL APERTURE CALIBRATOR
WITH MAGNIFICATION OF 50X

GO. NO-GO GAUGE

LINEAR MESH COUNTER WITH
MAGNIFICATION OF 8X

SCALES

ULTRASONIC VIBRATING SIEVE

Ultrasonic vibrating sieves are an improved version of normal sieves. These sieves are used on ultrasonic sifter machines which are fitted with an ultrasonic system, enabling clients to experience accurate sieving on finer mesh particle size 300 microns or below. These ultrasonic vibrating sieves eliminate use of bouncing balls and other anti blockage devices that cause severe problems like delayed sieving process, product contamination and reduced mesh life. Ultrasonic vibrating sieves offer better results of sieving for all kinds of powders, especially sticky and difficult powders adding product quality and integrity.

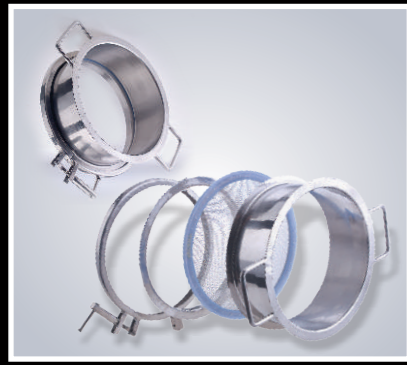

TEST SIEVES

These are available in various sizes 4", 8", 12", 18" & 24". The most common size is 8" diameter in stainless steel 316Q frame and sieve from 04 mesh to 500 mesh in lead free quality. These are available with a complete set of certificates.

HAND SIEVING FRAMES

These are available in various sizes & shapes, commonly used are round and square shapes. These sieves are used for hand filtration or can be attached on a container or drum. These are in 100% lead free sieves from 04 mesh to 500 mesh, with a complete set of certificates.

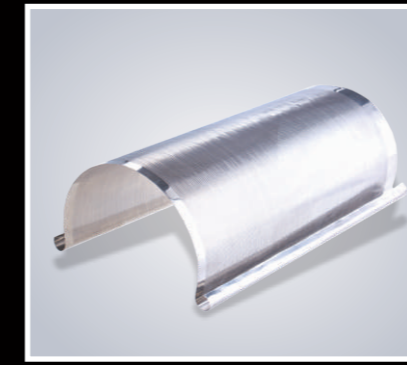

DETACHABLE SIEVING FRAME

These are specially designed sieves where the user can retain the container and can change the sieves. When required, the sieve is fixed between top and bottom portion with clamp. They are available in various sizes. 100% lead free design with a complete set of certificates.

CO-MILL SCREEN

These are available in various sizes as per capacity of machines. Available from 0.1mm to 25mm hole diameter, sizes below 0.5mm and odd size perforation and even square shaped perforation is achieved by laser perforation S.L.E. Technology. Also available in Triangular Grater (T.G.) and Spherical Grater (S.G.) for Indian and imported machines, available with a complete set of certificates.

OSCILLATING GRANULATOR SCREEN

These are available in various sizes according to the machine size. The most common size is 488mm width x 510mm length, available from 0.1mm to 25mm hole diameter, size below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. Technology. Also available in Triangular Grater (TG) and Spherical Grater (SG) with a complete set of certificates.

CLITMILL SCREEN

These are available in various sizes, the most common size is 91mm width x 426mm length, available from 0.1mm to 25.0mm hole diameter, size below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. Technology. Also available in Triangular Grater (TG) and Spherical Grater (SG) with a complete set of certificates.

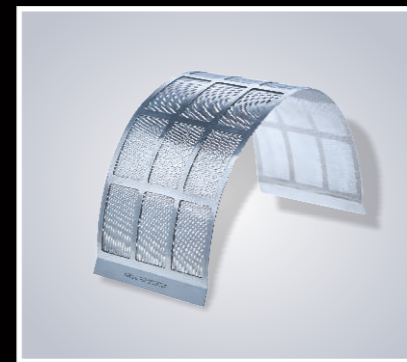

TURBO ROTARY SIFTER SCREEN

These are available from 0.1mm to 25.0mm hole diameter and size below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. Technology. Also available in Triangular Grater (TG) and Spherical Grater (SG) with a complete set of certificates.

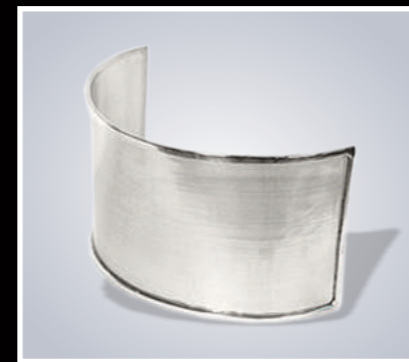

MULTIMILL SCREEN

These are available in various sizes including lab sized model. The most common size is 265mm diameter x 140mm, Height from 0.1mm hole diameter to 25mm hole diameter, sizes below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. Technology. Also available in Triangular Grater (TG) and Spherical Grater (SG) with a complete set of certificates.

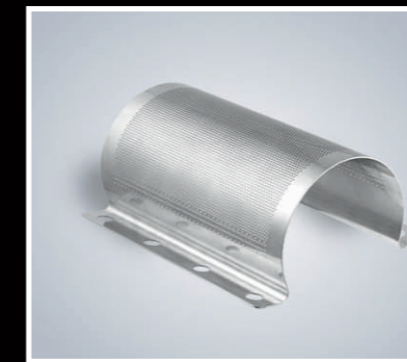

CADMILL SCREEN

These are available in various sizes including lab sized model. The most common size is 150mm width x 545mm length available from 0.1mm hole diameter to 25mm hole diameter, sizes below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. Technology. Also available in Triangular Grater (TG) and Spherical Grater (SG) with a complete set of certificates.

PULVERISER SCREEN

These screens are available in various sizes, the most common size is 175mm width x 480mm length, available from 0.1mm to 25mm hole diameter, size below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. Technology. Also available in Triangular Grater (TG) and Spherical Grater (SG) with a complete set of certificates.

SCREEN FOR EXTRUDER

These screens are available in various sizes from 0.1mm hole diameter to 25mm hole diameter, sizes below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. Technology. Also available in Triangular Grater (TG) and Spherical Grater (SG). Also available in wire mesh design with a complete set of certificates.

SOLUTION FILTER SCREEN

This screen is used for filtration of solution, available from 0.1mm hole diameter to 25mm hole diameter, size below 0.5mm and odd size perforation is achieved by laser perforation S.L.E. technology with a complete set of certificates.

SCREEN FOR ROTARY SIFTER

This screen is available from 0.1 mm hole diameter to 25 mm hole diameter, sizes below 0.5 mm and odd size perforation is achieved by laser perforation. S.L.E. Technology. Also available in Triangular Grater (TG) and Spherical Grater (SG) with a complete set of certificates.
