

# Neutralizing Antibodies for Infectious Diseases

Creative Diagnostics offers a comprehensive selection of neutralizing antibodies to combat infectious disease pathogens. These antibodies can be utilized in various applications including ELISA assay kits, neutralization experiments, WB, IHC, and other related processes. We can also provide services such as host switching and antibody modification tailored to your specific needs. Our proprietary cloning platform allows us to produce high-quality recombinant versions of these antibodies, which are valuable reagents for vaccine development and diagnostic research.

## Features and Benefits

- Applications: Neut, WB, ELISA, IHC, IF, Func, etc.
- High sensitivity and specificity: precise binding of surface antigens.
- Batch-to-batch stability: minimal batch-to-batch variation.
- Customizable: recombinant antibodies can be customized.
