# The Company

- AQMA Italia has been founded in 2016 with the aim of actively contributing to the development of Italian nutraceutical production and distribution. The Company, with its registered office in Milan and operative office in Naples, is an innovative start-up in the field of nutraceutical market, and Aqma Italia products are designed for being functional nutraceuticals with therapeutic effects. Company products are made after results of in-depth research, based on clinical studies, and after analysis of consumers requests together with therapeutic needs of doctors and pharmacists. Company goal is to create products designed to improve quality of life of people in their daily lives, relieving both occasional and chronic discomfort and problems.
- In the first step of product designing, AQMA Italia matches consumer needs and research results, with respect for quality and with the guarantee of an increasing number of clinical studies, on actives and on finished products. Our focus is **THE HUMAN BEING**, put at the center of Aqma's values and studies, with the main aim of supporting everybody's needs for liveability and daily health, to improve them or in any case to keep them in the best possible way. Therefore, our R&D is committed to respond to the physiological, relational and social needs of the population, to guarantee them at the best and to alleviate inconvenience and pain, occasional or chronic.

# Our values

- AQMA ITALIA is a pharmaceutical company developing high quality and INNOVATIVE patented products entirely Made in Italy
- and promotes a new care and **WELL-BEING PHILOSOPHY**, allowing consumers to improve their standard of life by integrating nutritional elements functional to the maintenance of our body's activities.
- Study and accurate selection of active ingredients, production in GMP certified plants and above all collaboration with Public and private Hospitals, Universities, Clinics and high level scientific partnership represent Aqma essential topics together with performing **CLINICAL TRIALS** on products to test and confirm their effectiveness and safety.
- Our food supplements are **functional nutraceuticals with therapeutic effects**. They are the result of careful internal R&D processes enabling us to offer a new way to improve health, treat chronic diseases, slow down aging process, increase and improve life expectancy, or just support functions and integrity of the body. Our products are healthy sources aiming to increase and improve life expectancy

# Research & Development

- RESEARCH & DEVELOPMENT is the heart of the company. AQMA R&D department carries out deep analyses through specialized laboratories with focus on consumers, specialists and experts in pharmaceutical and cosmetic fields.
- After deep analysis of clinical studies, our experts select active ingredients and the adequate concentration of substances to be used for creating Aqma products. Production is full **MADE IN ITALY**, according to the strictest national and international regulations, and guarantees a high scientific profile and the best results. Constant study, innovative modulation of active ingredients, production in Italian plants, **GMP** and **ISO** certified, collaboration with major players in health sector, public and private hospitals and university clinics, to conduct clinical studies on products, represent Aqma working model.
- AQMA ITALIA pays attention in its research, development and marketing activities towards multiple areas with the aim of **improving consumers quality of life**.
- We try every day to develop solutions that can meet well-being needs of consumers and of healthcare professionals

# PARTNERSHIP

- Aqma is ready to support its distributors with **scientific-technical studies**, further information and brochure, as well as **individual training** with our specialists, also through webinars.
- Marketing support is also offered and can be either in the form already in place, as well as tailor made for specific requirements.

ITALIA SPA

## Medical Device for women' health

# Gynacid

With hyaluronic acid, boric acid and lactic acid

Gynacid ovules® is a medical device that helps maintain the natural defenses of the vagina and enhances the recovery the normal vaginal flora.

Hyaluronic acid, boric acid and lactic acid help to **balance vaginal hydration** and/or **vaginal pH**.

Hyaluronic Acid (10 mg/ovule in its sodium salt form) exerts an hydrating and lubricating action against vaginal dryness contributing to restore a natural and comfortable vaginal environment. Lactic Acid, normally present in the vagina, favors an immediate pH correction and facilitates the natural recovery of the delicate vulvo-vaginal ecosystem. Boric Acid, thanks to its persistence in the vaginal environment, favors a lowering of pH prolonged over time.

It is useful in the **prevention and treatment of vaginal dryness** also in mycotic character. It helps reducing irritations, burning and itching.
