

drug discovery • drug development • drug manufacturing

let us be your expert guide

An emerging industry leader, August Bioservices offers a broad spectrum of pre-clinical, clinical and commercial contract services. Our ambition is to become the “one-stop, end-to-end” preferred partner for our customers’ drug discovery, drug development and drug manufacturing needs.

pointing the way™

drug discovery

We understand what you're looking for.
A validated target. A unique chemical entity.
A molecule that is "druggable". August can show
you the best way to go from unproven idea to
ownable IP that can help improve patient lives.

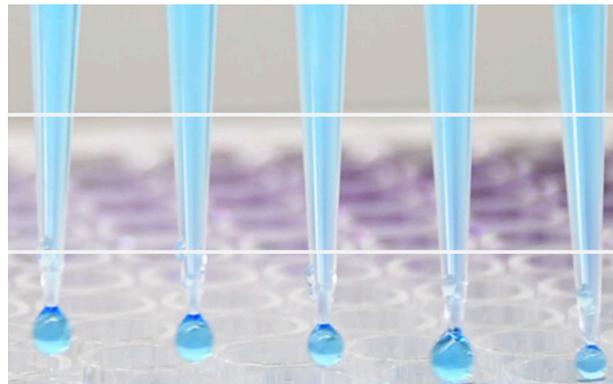

target

validate

generate

pre-clinical

- Customized, fragment-based drug discovery methods
- Best-in-class target protein engineering expertise
- HTP Screening, hit characterization and lead development
- SPR, ITC, MassSpec instrumentation
- In vivo and in vitro capabilities

Production of high-quality mAbs is designed to improve upon the limitations of first-wave antibody-drug conjugates (ADC).

*It starts with an idea...
a twinkle in your eye.*

*The dream is alive with
a confirmed target.*

drug development

Whether your project is a pre-clinical pilot, prepping for clinical trials or needing to optimize formulation for commercial readiness, we know what you need: proven processes that ensure optimized quality in every scalable, repeatable result.

formulate

optimize

scale

clinical

- Formulation screening and development
- Manufacturing process development and optimization
- Analytical and microbiological method development and validation
- Pilot scale to late stage clinical trial manufacturing
- Full ICH stability study design and execution
- CMC submission readiness, including: specifications, Quality Target Product Profile (QTPP), Critical Quality Attributes (CQAs)

*Your custom-designed molecule has legs...
and the power to scale effectively.*

*Your molecule moves
to mammals...*

drug manufacturing

We invite you to leverage our decades of cGMP finished pharmaceuticals manufacturing experience to deliver the goods for you. With our ability to accommodate a wide variety of fill volumes, dosage forms and delivery systems, August can supply and support your manufacturing needs – from clinical trials through commercial readiness.

supply

control

support

- Automated filling for multiple dosage forms, including: sterile injectables, topicals and oral solutions
- Microfluidization capability for particle size reduction, nano- and microemulsions, liposomes, and nanoencapsulation
- Full manufacturing services and process management, including: testing, stability, packaging, labeling and kitting, distribution and warehousing/storage
- Clinical trial supply and management
- Available stand-alone services, including: testing, packaging and labeling, storage

Our vial filling capability is from 1 mL to 100 mL.

*Ready for human trials...
you're almost there!*

Going commercial!

our future

We are executing on our vision to become the preferred, “one-stop, end-to-end” provider of outsourced drug discovery, development, and manufacturing services. We are expanding our current facility while also building a new, state-of-the-art, 60,000 sq ft commercial manufacturing facility.

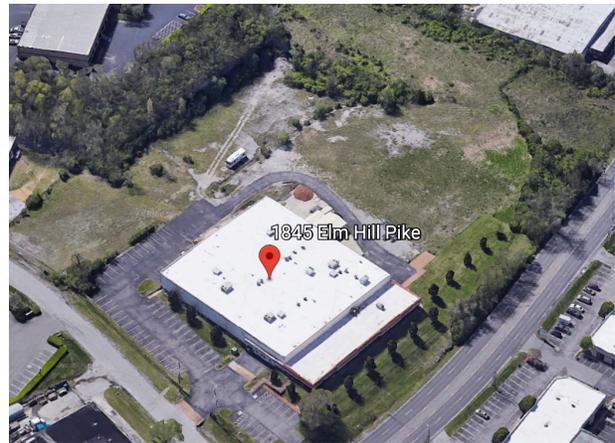

invest

expand

grow

commercial (coming soon)

- Multiple high-speed production lines delivering commercial-scale throughput
- Aseptic filling, sterile injectables (vials, IV bags, prefilled syringes), lyophilization and terminal sterilization capabilities
- Constructing to cGMP standards
- Robust testing services, including: stability, sterility, CCIT, endotoxin, visible and subvisible particulate
- Serialization, packaging, labeling, storage, shipping, and fulfillment

Our current facility in Nashville is undergoing expansion.

We're adding syringes, IV bags and terminal sterilization capabilities!

our credo

Everything we do, we do with great care.

We believe in the promise of discovery and the power of science to transform lives.

We assert that excellence is not a static destination, but a standard, and an every-day measuring stick of our advancement.

We aspire to unlock the potential in every person, every process and every molecule — from start to finish.

We are committed to doing the right thing the first time and every time, meeting or exceeding all regulatory requirements.

We strive to be exceptional, preferred and indispensable partners for our customers; responsible and engaged citizens within our communities; and active, mindful stewards of our environment.

We are August Bioservices.

We are pointing the way forward.
