

# UBLAC

*YOUR ALL WEATHER PROBIOTIC FRIEND*

Clinically proven probiotic formulation for digestive and immune health.

Globally, 44% of people experience digestive health problems which could be attributed to altered gut microbiota (dysbiosis).

The probiotic *Bacillus coagulans* Unique IS-2 in UBLAC is clinically proven to help maintain digestive health by preventing various GI disorders like diarrhea, constipation, irritable bowel syndrome, inflammatory bowel disease, etc.

## INDICATIONS & CAUSES

Dysbiosis is an imbalance of the microbial ecosystem along with the loss of beneficial bacteria. Gut dysbiosis has been implicated in a wide range of diseases which include intestinal disorders like IBD, IBS, and coeliac disease, and extra-intestinal conditions like allergies, asthma, metabolic syndrome, cardiovascular disease, and obesity.
