

OtiBuddy

OtiBuddy® is a solution to regularly clean and dry dogs' ears at home, especially those dogs with long, hairy, and floppy ears that are more prone to suffer from external ear infections.

PROBLEM

Otitis Externa is the third top reason dogs visit the Veterinarian after skin and stomach conditions. Up to the 15% of dogs suffer from ear problems, especially those with long, hairy, and floppy ears. These predisposing factors mean that parasites, allergies and recurrent infections find a favourable environment to triggering infection.

SOLUTION

OtiBuddy® is a combination of ingredients that provide a drying, astringent, emollient and mild antiseptic action to tackle the risk of infection.

RESULTS

Thanks to its drying, astringent and skin-shielding properties, OtiBuddy® is an ear care solution suitable for dogs that love swimming and those prone to accumulate moisture and dirt due to long, floppy, or hairy ears.
