

Your local **gas generation** partner

## Streamline your **laboratory workflow** with a **gas generator**

We have been developing world-class laboratory nitrogen, hydrogen and zero air gas generators for nearly two decades. Our generators are engineered to deliver the consistent flow and purity your instrument demands, at the push of a button.

What makes the real difference, is our own network of certified Peak service engineers located across the globe, providing rapid response on-site maintenance and support, whenever you might need it. Our commitment is to keep your gas flowing day in, day out.

Your local **gas generation** partner

A Peak gas generator holds many advantages over traditional gas supply methods such as cylinders. With safety, convenience and consistent purity at the heart of our innovative gas technology, our generators are the practical and ideal choice for your lab analysis.

**Peak generators are:**

**Convenient**

Gas delivered on-demand, no cylinders to change or supply stocks to maintain

**Consistent**

Consistent gas quality and supply, no impurities or running out of gas

**Economic**

Eliminate on-going costs of cylinders, manage lifetime running costs

**Safe**

No pressurised compressed gas cylinders in your lab

**Green**

No repeated gas deliveries, energy efficient

**Protected**

Comprehensive on-site warranty and service plans
