OUR STRENGTHS

- Pre-screening of suppliers, long-lasting business relationships and deep knowledge of the local market and its regulations are the strengths and differentiators of our activity.
- Any products or complex molecules you are looking for can be supplied as made-to-order (custom manufacturing) or made-to-stock (catalogue items).
- Based on a reactive (your request) or proactive (pipeline analysis) business model, we can act as your external procurement arm.
- We support your project management activities, over both technical and administrative matters. We arrange logistics, export/import clearances and customs duties. We support your REACH and CLP activities.

THANK YOU
