

Swiss Custom Manufacturing

“Ongoing Change is vital to Progress.”

**– Joseph Rohner,
Company Founder**

Rohner AG upholds this philosophy from its founding in 1906 to the present day, from the production of formic acid, to the development and global marketing of textile dyes, state-of-the-art performance chemicals, APIs and intermediates.

As a leading custom manufacturing company located in Switzerland near Basel, we serve demanding customers in growth markets with a traditional Swiss commitment to quality - providing them with development and rapid scale-up of complex, multi-step synthetic processes.

Thanks to our long-lasting customer relationships, our prize-winning knowledge and experience, we have realized significant growth.

Your Agile Experts

As a mid-sized chemical company we are more flexible than larger companies:

- Responsive to our customers' needs in a more dynamic customer-centric way
- Adaptive to the most diverse reaction requirements
- Agile and seamless scale-up from laboratory to production at a single site

The RohnerChem Advantage

- Route identification and process development
- R&D to commercial scale manufacturing
- cGMP manufacturing for APIs or intermediates
- Flawless up scaling with a focus on continuous improvement

Core RohnerChem Technologies

- Asymmetric catalytic hydrogenations
- Transition metal catalysis
- Hazardous and malodorous reagents
- Biocatalysis and chemocatalysis for unique chemistries
- Functional polymers
