inVag

- Indications:** To **restore** or supplement normal vaginal flora and to maintain the correct pH in the vagina
- Active substance:** 3 strains of live lactic acid bacteria: *Lactobacillus fermentum* 57A, *Lactobacillus plantarum* 57B, *Lactobacillus gasseri* 57C
- Form:** Vaginal capsules
- Package content:** 1 blister with 7 capsules in a cardboard box with a leaflet, 2 blister pack with 7 capsules each in a cardboard box with a leaflet
- Status:** Medicinal product

prOVag

- Indications:** For the dietary management of **urogenital flora disorders** in women to restore or supplement normal vaginal flora and to maintain the correct pH in the vagina
- Active substance:** 3 strains of live lactic acid bacteria: *Lactobacillus fermentum* 57A, *Lactobacillus plantarum* 57B, *Lactobacillus gasseri* 57C
- Form:** Oral capsules
- Package content:** 1 blister with 10 capsules in a cardboard box with a leaflet; 2 blister pack with 10 capsules each in a cardboard box with a leaflet
- Status:** Food for special medical purposes

prOVag gel

- Indications:** Recommended for **women and children** with tendency to dryness of external intimate areas, disorders of the natural microflora and recurring inflammations
- Active substance:** *Lactobacillus* sp. metabolites
- Form:** Gel
- Package content:** 30g Airless container in a cardboard box with a leaflet
- Status:** Medical device

prOVag emulsion

- Indications:** For daily care and hygiene of intimate areas
- Active substance:** Metabolites of bacteria of the *Lactobacillus* genus, aloe extract, panthenol and allantoin, caprylyl glycol, glycerine, lactic acid and delicate, non-irritating washing substances
- Form:** Emulsion
- Package content:** 150 ml bottle with pump in a cardboard box, 300 ml bottle with pump in a cardboard box
- Status:** Cosmetic

HydroVag emulsion

- Indications:** Specialist intimate hygiene emulsion for women 40+
- Active substance:** Metabolites of *Lactobacillus* strains, sodium hyaluronate, extracts of soapwort and cotton, oak bark extract, panthenol, allantoin, glycerol, lactic acid, washing agents not irritating the skin.
- Form:** Emulsion
- Package content:** 150 ml bottle with pump in a cardboard box, 300 ml bottle with pump in a cardboard box
- Status:** cosmetic

HydroVag

- Indications:** To alleviate dryness and discomfort in the intimate areas caused by e.g. oestrogen deficiency, **vaginal atrophy**; to support regeneration of vaginal mucosa; to alleviate pain in dyspareunia; to maintain the normal microflora and pH level in the vagina
- Active substance:** 10 mg of sodium hyaluronate, glycogen, lactic acid
- Form:** Vaginal pessaries
- Package content:** 1 blister with 7 pessaries in a cardboard box with a leaflet
- Status:** Medical device

Lactovaginal

- Indications:** To **restore** or supplement the normal bacterial flora of the vagina
- Active substance:** Live lactic acid bacteria: *Lactobacillus rhamnosus* 573
- Form:** Vaginal capsules
- Package content:** 1 blister with 10 capsules in a cardboard box with a leaflet
- Status:** Medicinal product

Lactoangin

- Indications:** For supportive treatment of mouth and throat infections
- Active substance:** *Lactobacillus* sp. metabolites, menthol, mentha arvensis
- Form:** Spray
- Package content:** Bottle with applicator containing 30g of preparation in a cardboard box with a leaflet
- Status:** Medical device

Clodivac

Diphtheria and tetanus adsorbed vaccine, reduced antigen content

- Indications:** For active immunization of adolescents and adults against tetanus and diphtheria
- Active substance:** Tetanus and diphtheria toxoids
- Form:** Suspension for injections
- Package content:** 1 glass ampoule in a cardboard box with a leaflet; 15 glass ampoules in a cardboard box with a leaflet
- Status:** Medicinal product

Tetana

(Tetanus vaccine adsorbed)

- Indications:** For active immunization against tetanus in children, adolescents and adults
- Active substance:** Tetanus toxoid
- Form:** Suspension for injections
- Package content:** 1 glass ampoule in a cardboard box with a leaflet; 5 glass ampoules in a cardboard box with a leaflet
- Status:** Medicinal product

Polyvaccinum mite

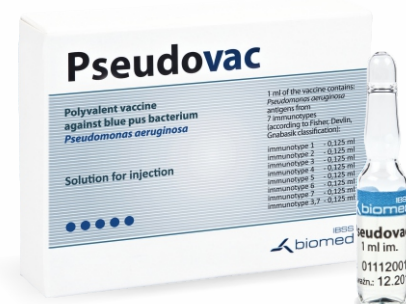

- Indications:** Protects against recurrent upper respiratory tract infections
- Active substance:** Inactivated bacteria: *Staphylococcus aureus*, *Staphylococcus epidermidis*, *Streptococcus salivarius*, *Streptococcus pneumoniae*, *Streptococcus pyogenes*, *Escherichia coli*, *Klebsiella pneumoniae*, *Haemophilus influenzae*, *Corynebacterium pseudodiphtheriticum*, *Moraxella catarrhalis*
- Form:** Nasal drops, suspension
- Package content:** 10 ml suspension in a glass bottle with a screw cap and a dropper in a cardboard box with a leaflet
- Status:** Medicinal product

Pseudovac

(Polyvalent vaccine against blue pus bacterium *Pseudomonas aeruginosa*)

- Indications:** Prophylactic treatment to achieve active immunity against infections caused by *P. aeruginosa*; therapeutic treatment: in case of existing infections caused by *P. aeruginosa*, in order to augment specific immunity and lower the risk of development of *Pseudomonas aeruginosa* bacteraemia and septicaemia
- Active substance:** *Pseudomonas aeruginosa* antigens from 7 immunotypes (according to Fisher, Devlin, Ghabasik classification)
- Form:** Solution for intramuscular injections
- Package content:** 5 glass ampoules of 1 ml solution each in a cardboard box with a leaflet
- Status:** Medicinal product

- Established in 1945
- Own manufacturing plant
- GMP Certificate
- ISO Certificate 22000
- ISO Certificate 13485
