look finish.

The classy and solid solution
for cosmetic products.
A high-quality clear glass
look combined with the
valued airless technology
(bag-in-bottle).

Various designs
on request.

CLASSY DESIGN | SAFE PACKAGING FOR PREMIUM COSMETICS

Airless technology in perfection and elegance.

The patented airless-technology by Gaplast
(Airless Motion®) being presented in a special
design with a solid clear glass look.

AIRLESS IN GLASS FINISH

In glass look refined multi-dose container for cosmetic products packaged without preservatives.

Made of a multilayer (hybrid packaging) container with a solid outer layer and a flexible integrated inner bag, smoothly collapsing during the use. Finally, the airless-system is placed in a plastic glass look vessel.

An airless pump completely drains the bag and protects the product against contamination during the entire use.

CLASSY DESIGN | MULTIPLE COMBINATIONS

The airless system in glass look is available in three standard sizes and offers various design options:

- plastic container with inner bag transparent any selected colour (i. e. golden, brass look etc.)
- bottle size oval, round, square, waisted
- standard sizes: 15ml, 30ml, 50ml
