# Irritable Bowel Syndrome

Irritable bowel syndrome (IBS) is a functional gastrointestinal disorder (FGID). The term “functional” is generally applied to disorders where the body’s normal activities in terms of the movement of the intestines, the sensitivity of the nerves of the intestines, or the way in which the brain controls some of these functions is impaired. IBS is a group of colon disorders characterized by abdominal pain and discomfort, bloating, and sometimes bouts of diarrhoea and/or constipation. Symptoms tend to come and go. Diagnosis is based on signs and symptoms in the absence of worrisome features. There is no cure for IBS, but symptoms can often be eased with treatment.

## What causes IBS

It is not known exactly what causes IBS, but a variety of factors play a role. IBS symptoms may begin following an episode of diarrhoea. Also poorly coordinated or oversensitive to the signals between the brain and the intestines can make the body overreact to the changes that normally occur in the digestive process. There are stimuli that may trigger IBS symptoms, but may vary from one person to another, such as:

- Stress
- Food
- Hormones
- Other illnesses

## Solution

Lucovital® Irritable Bowel Syndrome capsules are a medical device that relieve the symptoms of excessive accumulation of gas in the abdomen and the pain associated with it in patients with IBS, including; feeling bloated, abdominal distension, fullness, belching and pain associated with gas in the abdomen.

## Mechanism of Action

The active ingredients are the natural mineral clay magnesium aluminium silicate (also known as diosmectite or bentonite) and a polysilicon simethicone. These are not absorbed by the intestines. Natural mineral clay magnesium aluminium silicate absorbs toxins, bacteria and rotavirus, preventing them from adhering to the intestinal membranes. Polysilicon simethicone allows gas bubbles in the stomach and intestines to combine more easily, permitting easier passage of gas.

## Claims

- Provide quick relief of painful symptoms and the pressure of excess gas in the digestive tract.
- Ease abdominal pain in diarrhoea predominant irritable bowel syndrome patients.
- Normalise peristalsis and reduce pain, thereby preventing intestinal obstruction.

## USP's

- Safe and non-allergic (gluten free)
- 100 % vegan
- Available in capsules

## Dosage

Obesimed® Irritable Bowel Syndrome is designed to be taken orally. The recommended dose is 2 capsules 3 times a day.

### Composition:

Natural mineral clay, Simethicone 50%, Microcrystalline cellulose, Stearic acid, Silicon dioxide, Helianthus annuus (Sunflower) seed oil.

### Product information:

- Obesimed® Irritable Bowel Syndrome
- Outerbox
- Instructions for use
- Bottle with 30 capsules / 2 blisters of 15 capsules

New! Take control of your life,  
don't let it be affected by IBS
