Anti Diarrhea Capsules

What is Diarrhea?

Diarrhea are loose, watery stools which occur more than three times in a day. Diarrhea is a common problem that usually lasts a day or two and goes away on its own without any special treatment. Diarrhea can be described as either acute or chronic. Acute diarrhea usually starts suddenly and can last up to two weeks. Chronic diarrhea continues for a longer period of time, usually more than two weeks.

Acute diarrhea is usually a symptom of a bowel infection, caused by bacteria, viruses and parasites. Chronic diarrhea can be a sign for example irritable bowel syndrome (IBS), inflammatory bowel disease (such as Crohn's disease and ulcerative colitis) and coeliac disease.

Diarrhea can cause dehydration. Dehydration is particularly dangerous in children and the elderly, and it must be treated promptly.

The Solution

Anti Diarrhea capsules is a medical device with mechanical and physical properties for the treatment of acute diarrhea in combination with standard rehydration therapy and for the relief of gas-related abdominal discomfort in adult and children ages 12 years and older. Anti Diarrhea capsules reduces the severity and duration of diarrheal episodes and relieves abdominal cramping and distension associated with acute diarrhea and intestinal disorders (gas, bloating, abdominal distension, abdominal pain, discomfort and flatulence).

Mechanism of action

The active ingredients are a natural mineral clay and simethicone. The active ingredients in Anti Diarrhea capsules are not absorbed in the intestines. Anti Diarrhea capsules absorbs toxins, bacteria and rotavirus, preventing them from adhering to intestinal membranes. Anti Diarrhea capsules allow gas bubbles in the stomach and intestines to combine more easily, allowing for easier passage of gas.

Claims

- Treats acute diarrhea in combination with standard rehydration therapy and relieves gas-related abdominal discomfort in adults and children ages 12 years and older.
- Reduces the duration of diarrhea and prevents prolonged treatment.
- Relieves painful symptoms and pressure caused by excess gas in the digestive tract.
- Improves abdominal pain in diarrhea, especially in those suffering from irritable bowel syndrome.

USP's

- Safe and non-allergenic
- Animal – gluten free
- Available in capsules

Dosage and use:

Anti Diarrhea capsules are to be taken orally. The recommended dose for adults and children ages 12 years and older is 2 capsules 3 times a day for 3-5 days, to be taken 15 minutes before a main meal with a large glass (250 ml) water.

Composition:

Natural mineral clay, Simethicone, Hypromellose, Microcrystalline Cellulose, Stearic Acid, Silicon Dioxide, Titanium Dioxide, Oleum Helianthus.

Product information:

- Lucovital® Diarrhea box with 30 capsules
- Outer box
 - Instructions for use
 - 15 capsules per blister
