Anti Parchment Skin

Parchment skin

Parchment skin needs special attention and care. Parchment skin is thin, extremely dry, fragile and easily injured. It almost appears to be translucent and is very sensitive. Parchment skin is often seen with elderly people. With age the connective tissue quality gradually decreases, skin becomes thinner and loses its elasticity. Some medical treatments and medication promote the development of a parchment skin, also at a young age, like for example cortisone, anti-coagulant, cytostatic agents or radiation, diabetes and liver diseases.

The solution

Anti Parchment skin is a cream specially developed to treat and relieve symptoms of parchment skin, like dryness, redness and itching. It repairs the skin barrier function and moisturizes the skin. Anti Parchment skin cream is composed of a combination of ingredients that moisturize, protect, soften and smoothen the skin.

Claims

- Treat parchment skin
- Relieves symptoms as dryness, redness and itching

Mechanism of action

The active ingredients are: glycerin, dimethicone, olus (vegetable) oil, ceramide NP. Glycerin is a natural moisturizer derived from vegetable oil. It helps the skin retain moisture and prevent dryness. Dimethicone is a silicon-based polymer, which puts a protective layer on the affected skin and blocks the trans epidermal water loss (TWEL). Olus oil also puts a layer on the affected skin and is also an emollient which makes the skin soft and smooth again. Ceramide NP supports the renewal of the skin's natural protective layer and forms an effective barrier against moisture loss.

USP's

- Repairs barrier function of the skin
- Maintaining hydration of the skin
- Puts a protective layer on the affected skin

Composition:

Aqua, Caprylic/Capric Triglyceride, Dicaprylyl Carbonate, Polyglyceryl-2 Dipolyhydroxystearate, Glycerin, Behenyl Alcohol, Olus Oil, Sodium Polyacrylate, Pentaerythrityl Distearate, Panthenol, Phenethyl Alcohol, Pentylene Glycol, Caprylyl Glycol, Butylene Glycol, Dimethicone, Squalane, Lauryl Glucoside, Sodium Lauryl Glucose Carboxylate, Allantoin, Hydrogenated Phosphatidylcholine, Butyrospermum Parkii Butter, Tocopheryl acetate, Hydroxyphenyl Propamidobenzoic Acid, Sodium Hyaluronate, Ceramide NP, Ascorbyl Palmitate.
