RETAILER BROCHURE

THE FUTURE OF SLEEP AIDS, ENERGY AND VITAMIN B12 DELIVERY

Based out of Los Angeles, Inhale Health® is a biotechnology company committed to using inhalation technology with positive intent - for the wellness of humanity. Our products are engineered to provide functional benefits with every breath.

As we stand here at the crossroads of biology and technology, we believe that nutrient Inhalation will progressively disrupt multiple industries, bringing forth the future of sleep aids, energy and vitamin B12 delivery.

Join us as we inspire a paradigm shift to redefine inhalation for good.

Inhalation is lab-tested to allow rapid uptake of micronutrients immediately into the bloodstream.

Our patented technology transitions Caffeine, Melatonin and Vitamin B12 to an inhalable form for convenient use.

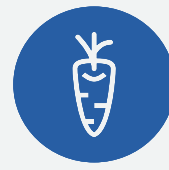

Zero nicotine. Zero tobacco. Zero propylene glycol. Zero calories.

Formulated in the USA using pharmaceutical grade ingredients and an organic vegetable base.

Each inhaler lasts for 400 breaths. No refilling or recharging.

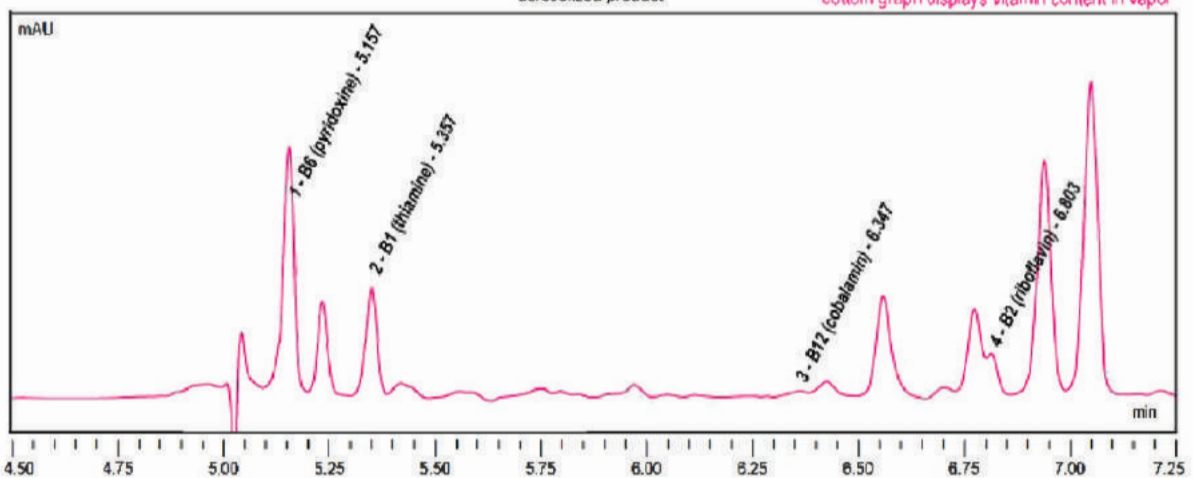

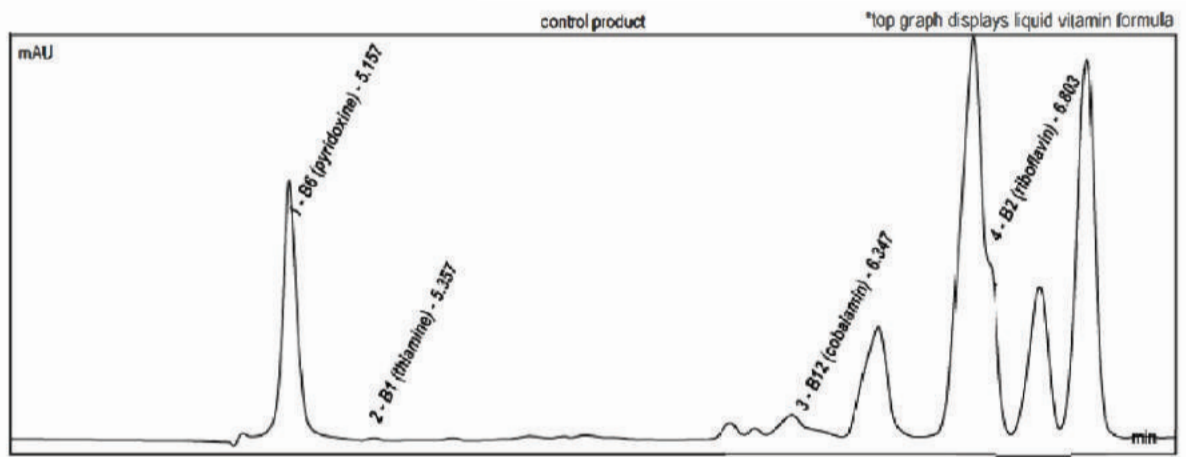

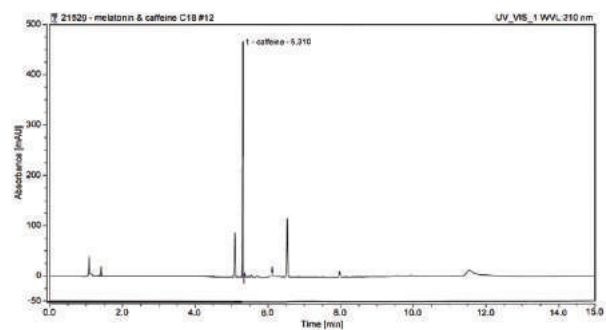

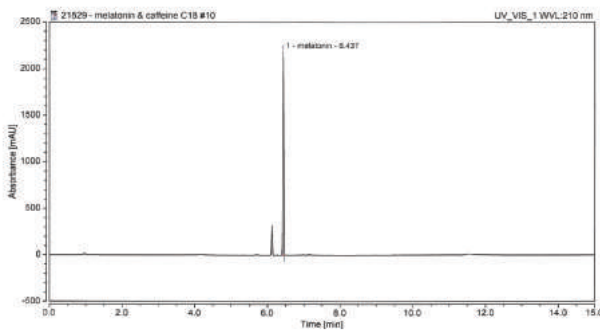

All products are vegan friendly and do not contain any animal byproducts or other harmful additives.

PROPRIETARY THERMOCHEMISTRY

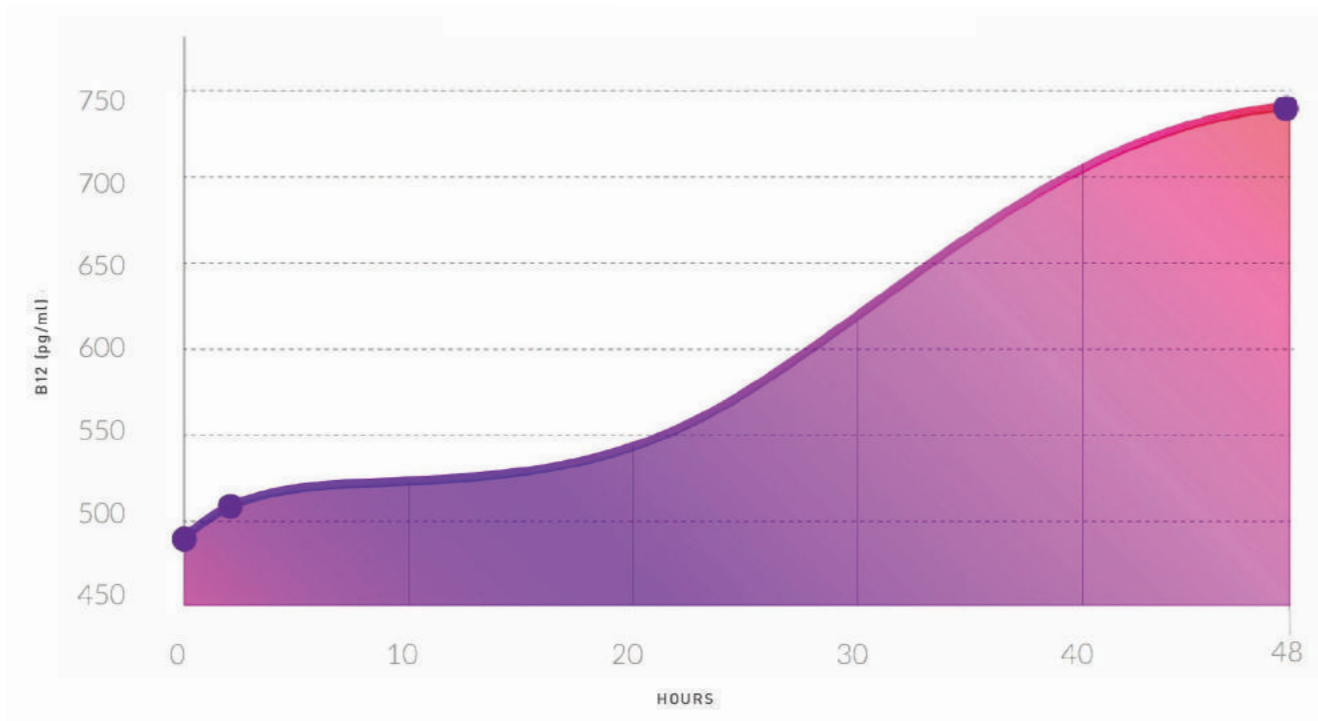

Our devices apply proprietary thermochemistry allowing active micronutrients to transition to aerosol whilst remaining bioactive. Inhalation allows them to be rapidly absorbed and bypass the inefficiencies of the digestive system. The chromatogram below illustrates the successful transition of our liquid nutrient formulas to bioactive aerosols.

IN-VIVO DATA

Pilot clinical studies monitored B12 levels in the blood before and after use of Inhale Health® Vitamin B12. Blood levels taken two hours after product use demonstrated an immediate increase in serum B12 levels, proving rapid absorption. Continued use over a 48 hour period increased serum B12 levels by 232pg/ml.

This rate of increase effectively addresses B12 deficiency. Patients are said to be deficient when B12 levels are less than 200pg/ml. Inhale Health® Vitamin B12 increased serum B12 levels well in excess of this amount within 48 hours of product use.

CAFFEINE

Instant Energy™

CAFFEINE

Stay alert and energized with near-instant absorption of caffeine.

Without the added sugar or calories found in energy drinks, Inhale Health® Caffeine is a convenient alternative for an instant burst of energy on-the-go. Inhale Health® Caffeine delivers USP-grade caffeine with greater efficacy than ingestible alternatives, allowing you to experience alertness at a moment's notice. Instant energy is just a breath away.

CAFFEINE WILD FLOWER™

CAFFEINE SUNBURST ORANGE™

VITAMIN B12

Your Daily Vitamin, Inhaled™

VITAMIN B12

Rapidly heighten and maintain essential Vitamin B12 levels.

Backed by clinical pilot studies, Inhale Health® Vitamin B12 provides a convenient way to rapidly deliver essential micronutrients to the bloodstream, allowing you to bypass the inefficiencies that often lead to Vitamin B12 deficiency. Your daily vitamin, inhaled.

MELATONIN

Sleep On Demand™

MELATONIN

Sleep on demand with a revolutionary new sleep aid that supports relaxation and natural sleep hormones.

Inhale Health® Melatonin induces a more effective and natural way to sleep soundly through the night - allowing melatonin to be absorbed instantaneously, providing faster effects than pills, tablets or beverages. Finally, a good night's sleep is just a breath away.
