

## Aether Industries Ltd. – 2 Page Overview

**Overview:** Aether Industries, based in Surat, Gujarat, India, offers cutting edge organic and organo-metallic chemical process development services and custom manufacturing for advanced pharmaceutical intermediates from kilograms to 1000's of metric ton quantities. Founded in 2013 with a history deeply rooted in Indian and US chemical industry experience, Aether has grown to over 300 employees in 2018. Aether offers a highly qualified and experienced technical team, extensive bench capabilities, an exceptionally well equipped pilot plant and new, state-of-the art manufacturing facilities. In addition to custom contract synthesis, Aether also produces and sells a portfolio of advanced pharmaceutical intermediates, primarily for the Indian pharmaceutical market.

**Category of Product/Service:** Organic chemical process development and custom manufacturing

**Geographical Coverage:** Global client base. All R&D and Manufacturing located in Surat, Gujarat, India. Dedicated business development manager in the Americas (Midland, MI)

### What makes us stand out:

1. Quick and thorough assessment of client proposals followed by rapid, cost effective, highly professional project execution.
2. Unique chemistries paired with project-ready, cutting edge process technologies at both pilot and manufacturing scale. Featured chemistries: high pressure hydrogenations, Grignard reactions, alkoxide (EO) derivatization, isobutylene chemistry, organo-lithiation, coupling reactions (Suzuki, Heck), exothermic chemistry, etherification/Ullmann. Featured process technologies: homogeneous and heterogeneous catalysis, high pressure batch and continuous hydrogenation, cryogenic reactions, high vacuum distillation/fractionation, conversion from batch to continuous processes.
3. Strict adherence to IP protection...client owns all IP.
4. Thorough documentation of project activities, comprehensive reports, and (if requested) early stage engineering design packages (equipment lists and specs, P&ID's, control logic, etc.)
