

Corporate Headquarters, Newburyport, MA USA

Wide range of products

cGMP kilo-lab manufacturing suites

Corporate Overview

Strem Chemicals, Inc., established in 1964, is an employee-owned company that manufactures and markets specialty chemicals of high purity. Its clients include academic, industrial and government research and development laboratories as well as commercial scale businesses in the pharmaceutical, microelectronics, chemical and petrochemical industries.

Strem's corporate headquarters is located in Newburyport, 38 miles (60km) north of Boston. This facility occupies 48,000 sq. ft. (4,460 m²). The European headquarters and warehouse are located in Bischheim, France.

Experience in Manufacturing High Quality Chemicals

A wide variety of fine chemicals are available with a special emphasis on organometallics, catalysts, ligands and nanomaterials. Quality is the most critical component of all products and services. Most products are of high purity, typically at 99%, while some are as high as 99.9999% metals purity.

Custom Synthesis and cGMP Production

Custom synthesis services and process development are conducted under the strictest confidence. The variety of products manufactured for Strem's catalog of chemicals for research provides access to a wide span of technical expertise, in both inorganic and organic synthesis. Reaction capabilities for custom synthesis include:

Alkylation	Carboxylation	Grignard reactions	Organometallic reactions
Amination	Chiral chemistry	High Pressure reactions	Phosphorylation
Ammonolysis	Dehydrogenation	Hydroformylation	Quaternization
Asymmetric synthesis	Formylation	Hydrogenation	Reduction, Catalytic
Carbonylation	Friedel-Crafts reactions	Liquid ammonia reactions	

For pharmaceutical applications, manufacturing is conducted under current Good Manufacturing Practices (cGMP) in kilo-lab suites. This capability has been available since 1988. Complete documentation is provided, including validation and stability studies. Active Drug Master Files (DMF's) are also maintained in North America and Europe. Strem's cGMP facilities are FDA inspected.

Strem Chemicals is a member of SOCMA
(Society of Chemical Manufacturers & Affiliates)
and is committed to the ChemStewards® program.

Catalog of Chemicals for Research

Strem has established its reputation through its ability to provide over 5,000 specialty chemicals of high purity to the research community. This is done through a catalog that is updated every 18 - 24 months. A complete up-to-date listing of products can be found on our website. Strem's product range includes:

Biocatalysts	Metal alkyls & alkyl amides	Organofluorines
Catalysts & chiral catalysts	Metal carbonyls & derivatives	Organometallics
Electronic grade chemicals	Metal foils, wires, powders & elements	Organophosphines & arsines
Fullerenes	Metal halides & hydrides	Porphines & phthalocyanines
High purity inorganics & alkali metals	Metal oxides, nitrates & chalcogenides	Precious metals & rare earth chemicals
Ionic liquids	Metal Scavengers	Stainless steel bubblers for CVD/ALD
Ligands & chiral ligands	Metallocenes	Volatile precursors for MOCVD, CVD & ALD
Metal acetates & carbonates	Nanomaterials	
Metal alkoxides & beta-diketonates	Organocatalysts	

Key product lines include metal carbonyls, metal catalysts for organic synthesis, ligands, especially phosphines, nanomaterials, Metal Organic Chemical Vapor Deposition (MOCVD) and Atomic Layer Deposition (ALD) precursors. Many products are available on a bulk basis.

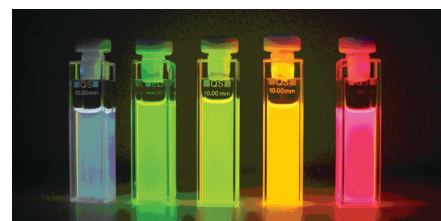

Rapid Customer Service

Strem maintains a large on-hand inventory to ensure that most catalog orders are fulfilled on the same day they are received. Technical service is provided with the same enthusiasm and speed to ensure that customers have the chemicals and information they need.

New Products and Proprietary Technologies

Strem has a history of collaborating with academic scientists which has led to the introduction of new products. Industrial partnerships have also resulted in the establishment of proprietary technologies and facilitated their commercialization.
