

# LUINABIO

BIOPHARMACEUTICAL MANUFACTURING

- cGMP biopharmaceutical Manufacture of APIs
- Microbial/Yeast Fermentation
- Recombinant Protein Production
- Live Biotherapeutics
- Process Development/Scale-up
- Cell Banking
- Stability Testing
- Warehousing and distribution of clinical supplies

**Luina Bio is one of Australia's most experienced biopharmaceutical contract manufacturing organisations**

## YOUR KEY TO EARLY PHASE MANUFACTURING

Our services provide cost effective manufacturing of your GMP clinical trial material. We offer rapid technology transfer, scale-up development and manufacturing of microbial cell-derived proteins at up to 500L scale for the preparation of active pharmaceutical ingredient (API) products to world class standard to provide a key to your product development success.
