## Your CMO to make powder even finer.

### Our Manufacturing Services

- Micronization
- Milling
- Process Development and Validation
- Cryogenic Milling
- Fractionated Sieving
- Homogenization / Blending

### Our Contract Lab Services

- Analysis of Particle Size Distribution (PSD)
- Development, Transfer and Validation of PSD Measurement Methods

**Quality made in Germany: Micronization is one key to reduce production costs caused by rejects that originate from differing API quality. We offer our consolidated knowledge about particle design to benefit our clients with a reliable solution for their manufacturing process. From the first trial to industry-scale production, from a few grams right up to tons, all with GMP certified quality.**

**Inspected  
by FDA, EMA  
and PMDA**
