

FIELD OF EXPERTISE:

4 Established European Companies

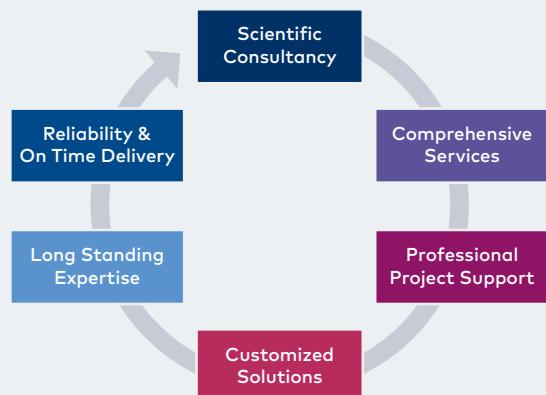

1 Personal Point of Contact

The members of GBA Group Pharma are located in the European Union, have an excellent track record in serving client needs and broad experience in handling small molecules as well as larger molecules, therapeutic peptides, biologics and cell based therapies and also ATMPs.

From early lead optimization and early preclinical stage to global clinical studies, we support you throughout the entire lifecycle with our central laboratory, GMP Depots, EU GMP manufacturing site for labeling and packaging and QP services, as well as late drug development and analytical services including import testing and QP batch release.

Your Challenges are our Business

 Preclinical Services GMP Testing Central Laboratory Clinical Trial Supply Regulatory
