**Peptide Synthesis &
Oncology API R&D Division**

**Impurity Synthesis /
Impurity Isolation Purification**

**Medicinal Chemistry &
Custom Synthesis Services**

**QBD : Analytical Method
Development & Validation**

INTRODUCTION

VEEPRHO is manufacturer and distributor of certified Pharmaceutical Impurity Reference Standards.

Specializes in isolation and purification of impurity by preparative HPLC as well as the custom synthesis of complex molecules.

We offer a variety of services to support pharmaceutical industries to help identify and optimise pre-clinical candidates in the area of small molecules drug discovery.

Our senior team members have years of experience in preclinical drug discovery in pharma industry. We are specialised in medicinal chemistry services, custom synthesis and providing innovative building blocks for pharmaceutical industry.

Growth of Veeprho has been stimulated in this market due to the growing demand for analytical and chemistry services. Increasing outsourcing of analytical testing by pharmaceutical companies, rising demand of regulatory, increasing acceptance of the QBD (Quality by Design) approach in pharmaceutical industry drive the growth of company. Our client base is spread across the world. Our main aim is to provide organic synthesis services that are world class and at the same time provide value for money too.

OUR MEDICINAL CHEMISTRY AND CUSTOM SYNTHESIS EXPERTISE INCLUDE

- 1. Synthesis of focussed libraries
- 2. Synthesis of Organic Scaffolds
- 3. Synthesis of NCEs
- 4. Custom chemical synthesis
- 5. Synthetic organic chemistry of all major chemotypes
- 6. Scale up to support in vivo efficacy and toxicity studies

Chemistry activities at Veeprho labs are directed by M.Sc. and Ph.D. level Organic & Medicinal Chemists with combined 40 years of experience in pharma and chemical industries.

Our team has experience in handling projects of all kind of complexities and has a reputation equalling the best in pharma industry. Our scientists use their expertise and the latest techniques to synthesise organic molecules.

PEPTIDE SYNTHESIS & ONCOLOGY API R&D DIVISION

VEEPRHO LABS has started Peptide Synthesis & Oncology API R&D Division, which is being developed under leadership of experts who worked with several major pharmacos.

IMPURITY SYNTHESIS

We offer a broad range of custom synthesis of fine chemicals, building blocks, derivatives of lead compounds and intermediates including reference standards, impurities and metabolites that covers different chemistries on the milligram to gram scale with certificates of analysis to support medicinal chemistry and process R&D. We ensure high quality standards and on-time delivery. We offer custom specific products through arrangements protected by confidentiality agreements.

IMPURITY ISOLATION-PURIFICATION

Isolation and Purification of known and unknown Impurity from milligram to gram scale. We have executed most critical isolation and purification processes for different projects in recent past.

LYOPHILIZATION SERVICES

We also Provide Lyophilization services for unstable drug product and drug substance at large scale. Veeprho's team of experts can assist you in all stages, from development and optimization of a lyophilization at small-scale manufacturing of lyophilized products.

Lyophilization is applicable to all kind of samples which are very sensitive to temperature. We have Virtis 25EL, Capacity of freeze drying is 500 g/day.

ANALYTICAL METHOD DEVELOPMENT AND VALIDATION

To ensure methods meet regulatory requirements we follow relevant ICH and CDER guidelines, such as ICH Q2(R1) or compendia guidance in combination with client-specific protocols. Performing analysis in collaboration with clients on method validation enables projects to be delivered faster with the benefit of increased robustness and ruggedness.
