

OUR MISSION IS TO PROMOTE AND SERVE THE UNIT DOSE MARKET, DELIVERING HIGH VALUE PROPOSITIONS TO OUR CUSTOMERS, THROUGH OUR UNIQUE BUSINESS MODEL BASED ON 3 COMPLEMENTARY AND SYNERGIC ACTIVITIES:

## 01

- › Sarong is the market leader for thermoforming fill and seal machines (FFS) for UNIT DOSE and the relevant packaging materials;
- › The R&D team focus on packaging innovation and customer requests;
- › Sarong owns more than 50 patents related to thermoforming machines and packaging technology;
- › To date, Sarong delivered more than 800 machines worldwide for pharmaceutical suppositories and liquid unit doses. Sarong has been supplying FFS machines for unit dose packing in FOOD, PERSONAL CARE & CHEMICAL since 1999;
- › In 2004 Sarong introduced a new generation of horizontal thermoforming machines, for FOOD and GENERAL PACKING application. Nowadays more than 250 machines for these applications have been delivered worldwide;
- › Sarong is ISO 2001/2000 certified. Its in-house operation specializes in packaging material selection and in converting packaging film with lamination, rotogravure printing and slitting operations for PVC, PET, PP and multi layers foils, in a ISO Class 8 room.

## 02

A modern factory with a controlled environment, rigorous control of all materials from the receipt to the supply and high production standards are what makes Sarong the ideal partner for companies looking for quality and reliability from their suppliers. We can offer a complete converting service of lamination, printing and slitting. The possibility of customizing materials together with a flexibility of production and delivery are just some of the Packaging Material Division strong points.

## 03

With more than 40 years experience in thermoforming and cutting plastic materials (and related products), Sarong is now a reference company in this sector. We are able to make highly versatile products, meeting the needs of different sectors, from pharmaceuticals to chemicals or food industry, ensuring the best standards of quality, hygiene and control.

From more than 10 years, in Sarong contract packing division, there is a number of vertical and horizontal machines available to our customers to fill and pack liquid and semi-liquid, chemical and cosmetic products, using standard tooling without extra costs for volumes from 1 up to 50 ml. On customer request, it will be possible at any moment to obtain personalized shapes.

## VISION

We commit to providing the market with user-friendly **UNIT DOSE** packaging solutions that help preserving the quality and increasing the shelf life of packed products.

Sarong's goal and ambition is to be one of the world's most innovative, trusted and reliable companies in the UNIT DOSE packaging market.

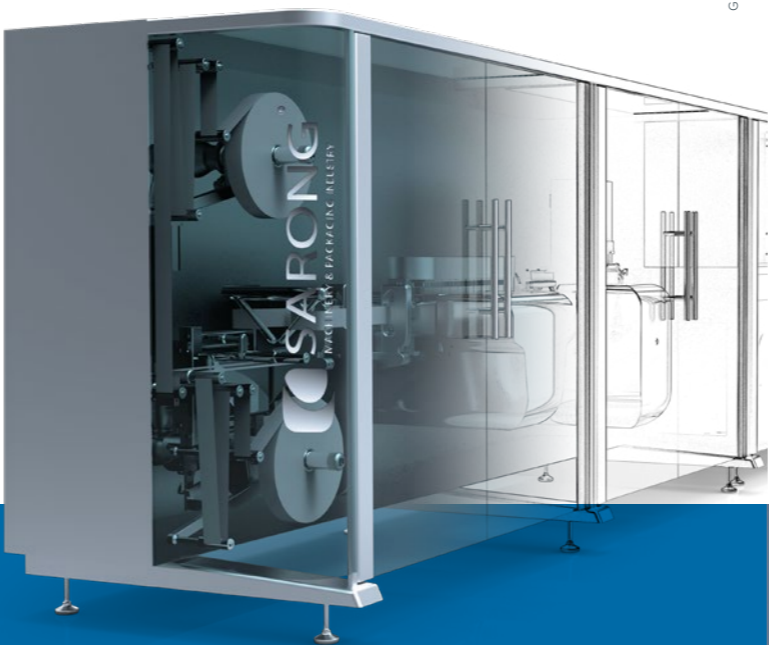

## MISSION

This business model enables Sarong to deliver products and services with an unrivalled added value consisting of its **deep knowledge of packaging materials and manufacturing processes**.

Established in 1972, Sarong has been growing thanks to its **reputation** of best-in-class provider of **tailor-made solutions** that meet the increasingly demanding needs of our customers in the pharmaceutical, food and chemical industries.

Our commitment to **customer's relationship**, our ability to provide the best technical and economical solutions through great **technical skills** and **creativity** are enhanced by significant investment in **R&D** and **technological innovation**.

What above has led Sarong to become **the reference in the unit dose packaging market**.

# PHARMA

## MACHINERY

Suppositories, ovules and pharmaceutical unit-doses machines: compatible with plastic & aluminium packaging materials.

# FOOD & BEVERAGE

## MACHINERY

Automatic vertical and horizontal thermoforming, filling and sealing machines to produce unit-doses for liquid, semi-liquid, coffee and powder products, with packaging made out of thermoformable, multilayer, plastic materials and barrier foils.

# HOUSEHOLD & PERSONAL CARE

## MACHINERY

Automatic vertical thermoforming, filling and sealing machines to produce unit-doses for liquid, semi-liquid products, with packaging made out of thermoformable, multilayer, plastic materials and barrier foils.

## PACKAGING MATERIALS

- > PVC / PE
- > PVC / PVDC / PE
- > ALU / PE blocking and peelable
- > PP / ALU / PE

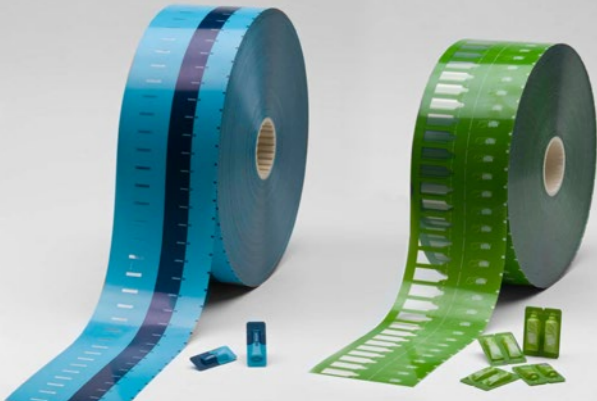

## PACKAGING MATERIALS

- > PVC / PE
- > PVC / PVDC / PE
- > PA / PET / PE
- > PET / PE
- > POLIEX AND POLIEX PLUS
- > PP / EVOH / PP for capsules

## PACKAGING MATERIALS

- > POLIEX AND POLIEX PLUS
- > MEMBRANE ALU FOIL for fragrance release
- > PET / PE
- > PVC / PVDC / PE
- > PA / PET / PE
- > ALU / PE peelable

## CONTRACT-PACKING

PREFORMED SHELLS, suppository and ovule cavities in rolls.

## PRODUCTS

Suppositories, ovules and pharmaceutical unit-doses.

## CONTRACT-PACKING

Capsules for coffee powder, tea leaves and infusions.

## PRODUCTS

Dressings, sauces, chocolate, spirits, energy drinks, nutraceuticals, capsules for coffee powder, tea leaves and infusions.

## CONTRACT-PACKING

Personal Care - Home & car air fresheners.
