## Our Mission

To provide the healthcare industry with technical and innovative solutions in thermoplastics, creating value while improving patient health.

## Our Commitments

A quality approach present at all levels of the company: production, logistics, development, and tools manufacturing. Personnel regularly trained in Good Manufacturing Practices. Competent, available and responsive teams. A state-of-the-art manufacturing base, with all the latest machinery and automation technologies.

## Expertise

### *Innovation*

For our customers to benefit from all the latest innovations, Ercé Médical ensures continuous technological and materials watch.

### *Development*

In constant contact with our customers, our development team can successfully carry out all of your projects, helping you turn your ideas into reality.

All our projects are managed by a Project Manager who works with a multidisciplinary team from several departments, notably Design, Industrial Methods, Testing, Quality Development, Regulatory Affairs, Logistics and Sales.

### *Industrialisation*

#### Plastic injection

Our production facility boasts some 1500 m<sup>2</sup> of ISO 7 and ISO 8 controlled-environment cleanrooms. The site comprises more than twenty 35 T to 260 T injection moulding machines (hybrid, electric or hydraulic), equipped with robots. All of the machinery is software-controlled, which ensures a real-time monitoring. All of our resources are planned using ERP software.

#### Finishings

We are skilled in several finishing technologies: assembly, welding, marking (screen printing and ink jet), and machining.

## Certifications

Product quality is central to everything we do. All of our projects are overseen by a Quality Development Manager, working closely with the Project Manager and responsible for implementing all of the relevant quality tools throughout the duration of the project. In terms of production, all of our employees are trained in Good Manufacturing Practices. We also have a quality system in place across the whole manufacturing chain, from the operators to the quality controllers and quality trainer. Ercé Médical's management system is NF EN ISO 13485:2012 certified. All of the Ercé Médical oral medication delivery systems bear the CE marking, in compliance with Council Directive 93/42/EEC.

## Business Segments

### *Segment* **PHARMACEUTICAL COMPANIES**

Own branded packaging products and systems for the administration of liquid medicines

### *Segment* **NATURAL MEDICINES**

Own branded packaging products for the homoeopathic industry

### *Segment* **COMPOUNDING PHARMACIES**

Own branded products for extemporaneous preparation

### *Segment* **SPECIFIC PRODUCTS**

A partner of choice for major pharmaceutical and healthcare industry players, Ercé Médical capitalizes on its extensive expertise for the development, production engineering and manufacture of all your products.
