Our Products and Contract Manufacturing

Phytophar® offers a widespread range of (brand) nutraceuticals, herbal and food supplements in different forms.

Our high volume blisterlines and sacheting capabilities deliver very high qualitative products. This overview represents only a sample of our contract manufacturing offer capabilities. In addition our product development service enables our clients to create completely new products of various forms made of a variety of active ingredients.

How we do it?

Inspiration

- New raw materials - excipients - coatings
- New formulations
- New delivery systems
- Upgrading of on-the-go packaging

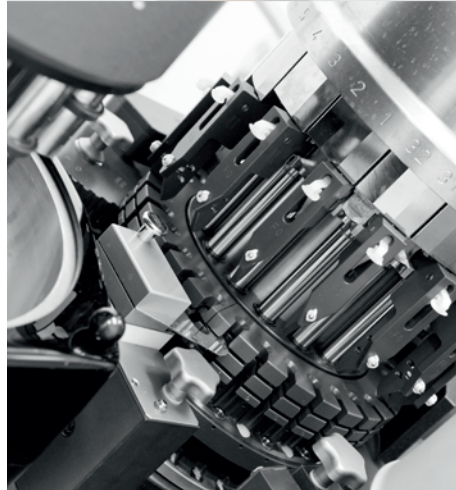

Development

- Scientific documentation
- Scientific communication material
- Upgrading of formulations supplied by the customer
- Regulatory

Manufacturing

Innovative Finished products with

- Enhanced bioavailability
- Enhanced solubility
- Good taste / Smell masking
- Improvement of product efficiency

We develop the optimal composition of your individual product together with an innovative team under the professional guidance of pharmacists in the company's internal laboratory. We advise you with respect to legal prerequisites and support you in product positioning and brand identity.

Passion and curiosity are fundamental to achieve ambitious results. Our success keeps growing thanks to the work of many people driven by sense of initiative and a great desire to realize new ideas.

AT PHYTOPHAR®, WE WORK TO CREATE, DEVELOP AND MANUFACTURE INNOVATIVE AND ADDED-VALUE NUTRACEUTICAL PRODUCTS.
