

ENDOCA

OUR STORY BEGAN WITH A VISION

It is human right to use plant medicine. Everyone in the world should have easy access to cannabis based medicine. Our goal is to make CBD common-place in all homes around the world by 2030 – it will have a place in the house just like salt and garlic.

10 years ago while studying genetics in Denmark, I traveled across Africa working on a project to increase the lifespan of people in the Zulu region suffering from AIDS. I spent time in the mobile clinics implementing mainstream medicine. Here, I saw how the drugs we were providing people with were only making things worse.

This took me on my journey which raised questions about everything we learn in university, and led me to start looking for alternatives that could restore our immune systems and health without side effects. In my search, I found correct nutrition was the answer. I found the cannabis plant to be very effective from looking into native medicine.

At the same time, over in the U.S., people were marching in the streets for the legalization of cannabis. They were advocating that the use of cannabis plants had helped them to overcome AIDS and other serious problems.

As I continued my research, I began to experiment by growing different hemp plants that contained little-to-no THC so I could grow them without a license. In Europe, hemp without THC has been legal to grow since 1997.

CULTIVATION

- We produce from our own fields in northern Europe
- We work with local GAP (good agriculture practice) certified farms

GMP CERTIFIED

- Good Manufacturing Practice (GMP) is a system for ensuring that products are consistently produced and controlled according to quality standards.

RESPECTING NATURE

- Our products are organic
- We don't use any chemicals in our processes

GUARANTEED % CBD

- Our CBD production method is the safest and cleanest way to extract CBD. The plant material is cooled under high pressure using CO₂ and then the CBD oil is extracted.

My starting point was the cannabinoid, CBD. In my days digging through the university archives, I found studies on epilepsy patients that had trialled CBD, and had displayed promising results since 1982. I was able to breed a variety of hemp that contained enough CBD and at the same time contained all the other macromolecules that were present in the original hemp plant.

I decided to help change the world's perception of cannabis by making non-psychoactive cannabinoids available online and disrupt the debate.

In 2010 I planted five acres of hemp and built a high tech lab. This is when Endoca first started. With the name taken from the endocannabinoid system, which was a hugely underexplored area in science and medicine, our company name also directly linked to cannabinoids. I created a website and an online shop which was the first in the world to sell CBD online. My main aim with the company was to make non-psychoactive cannabinoids, principally CBD, available to patients who needed them globally. Everything I made was built from scratch by investing slowly using funding from patients who were happy to pay for the products. We could produce more, help more patients, and spread the word. Today, we grow over 2,500 acres of organic land. We have built a factory that complies with pharmaceutical standards.

We strive to make CBD affordable around the world without compromising the quality. As we grow, we are bringing local farmers onboard where we provide them with the know-how and equipment to grow hemp for Endoca. We will be transforming millions of acres of non-organic land to organic. This means we will change common agricultural practices giving farmers the means and land to make more ecological choices.

By doing all of this, we hope to make a huge, positive impact on the global pollution problem.

Henry Vincenty
CEO Endoca

WHAT IS CBD?

CBD, or Cannabidiol, is a naturally occurring compound, also known as a "cannabinoid," found in cannabis and hemp plants. As well as CBD, the cannabis plant contains between 70 – 100 other cannabinoids.

It interacts with your body through your endocannabinoid system (ECS), the vast system that controls your body's general state of balance (otherwise known as homeostasis). The ECS regulates everything from mood, memory, the immune system, pain signaling, and inflammatory response. CBD has shown to help support functions such as appetite, mood, immune response, pain, sleep, and many more. By supporting our ECS through CBD use, we're returning our body back to its optimal state.

Most people have heard of a cannabinoid called THC which is the ingredient in cannabis that makes users feel high. Unlike THC, CBD is a non-psycho-active cannabinoid and does not cause a high.

DID YOU KNOW?

Endoca is named after the endocannabinoid system which plays a role in almost every physiological system in the body. For a long period of time, it was overlooked as a possible therapeutic target. However, with the incredible success stories reported from the use of medicinal cannabis and hemp products, particularly cannabidiol (CBD) and cannabidiolic acid (CBDA), many medical scientists are shifting their focus onto the endocannabinoid system (ECS).

OUR FIELDS

Endoca extracts CBD from hemp plants grown and cultivated organically without herbicides or pesticides. Our hemp grows in Northern Europe where the low lying and relatively flat land adds to the existing fertile soils. The partially favorable climate there (winter frost + warm and sunny summer with rainfall over the average) makes it ideal for hemp farming.

Endoca begins with the best seeds nature can create for CBD production. Our non-GMO organically grown hemp plants are gently harvested and dried under the most optimal natural conditions. The hemp harvest at Endoca employs the most dedicated staff and advanced tools in the world. We go above and beyond what's commonly available in the hemp industry including custom made technologies for prime CBD hemp farming.

THE PRODUCTS

Through a unique extraction process using only air, Endoca grows a special breed of hemp. We reproduce the natural and balanced phytochemical profile of the original dry cannabis material. Endoca believes the herb biochemical equilibrium must be maintained since this has proven to be effective throughout the ages to heal the body and promote good health.

HOW TO TAKE ENDOCA PRODUCTS

Just decide the strength you want and one of the following delivery forms:

-  DROPS for taste and maximum benefits
-  PASTE (first extract) for the purest form of hemp
-  CAPSULES for those that don't like the taste of hemp
-  SALVE for topical application and a nice smell on your skin
-  SUPPOSITORIES for if you can't take CBD orally or you just want max absorption
-  CHEWING GUM for if you like to eat it but don't like the hemp taste 99%.
-  CANNABIS CRYSTALS for if you want high strength CBD or want to vape it and get instant CBD in your blood circulation

Essentially, there are two categories taking CBD falls into:

INGESTION: Absorption can be delayed up to two hours or longer as it has to go through the digestive system. Because of a slower breakdown process, the CBD is released less quickly into the bloodstream.

INHALATION: Gets absorbed into the bloodstream within minutes. Lasts for a shorter duration as the concentrated amount only remains in the bloodstream for 2-4 hours.

OUR QUALITY GUARANTEE

"Patient safety is our top priority."

To ensure the quality of our products, we currently screen for over 300 contaminants to make sure every batch of our organic hemp is free from all pesticides and herbicides.

Endoca has invested enormous amounts of time and resources into our extraction methods, quality assurance, and quality control. Constant improvement is our goal to ensure precision, accuracy, as well as reputability in our extraction and product testing approaches.

Quality control is central to Endoca's quest to bring our customers the very best CBD and hemp products nature and science can offer. It's why we follow strict pharmaceutical industry standards throughout our entire production process.

We utilize the HPLC (high performance liquid chromatography) industry standard to monitor the oil composition at all points in the production process.

We go the extra mile to provide our customers with peace of mind and confidence that they have purchased the finest quality hemp products in the world.

RAW HEMP OIL DROPS (Medium)

A single drop of 3% Raw Hemp Oil contains 1mg
CBDa+CBD
Total drops: 300

THE RAW POWER OF NATURE IN A DROP

At Endoca, we interfere as little as possible with the plant's natural state. By choosing the unheated, unrefined raw hemp oil, you get the benefits of the hemp plant with its complex structure of over 400 unaltered molecules. Our unique formula contains both CBDa+CBD, other cannabinoids in their raw state along with vital omegas, vitamins, and minerals normally lost when heated.

Ingredients

- 1mg of CBD + CBDa per drop
- Made with 100% organic hemp
- Kosher, vegan, gluten free, non-GMO
- No preservatives or artificial colors

BEST ABSORPTION RATE

For people suffering from nausea, vomiting or a gastrointestinal condition, oral consumption may not be an option. In that case, our CBD suppositories are a great alternative administration method. Suppositories are an effective method for taking CBD because it's absorbed straight into the bloodstream via capillaries — therefore avoiding the digestive process (They're quick and effective). Used in this manner, CBD's effects are often noticed within 10-15 minutes after application and can last around 4-8 hours. Refrigerate before using. Wash hands before and after use. See our individual product pages for detailed directions.

Ingredients

- 50mg of CBD + CBDA per suppository
- Made with 100% organic hemp
- Organic coconut oil
- Kosher, vegan, gluten free, non-GMO
- No preservatives or artificial colors

ORGANIC CHEWING GUM

15mg CBD per gum
10 pieces of gum (150mg CBD)

HIGH EFFECTIVENESS

Chewing gum increases the effectiveness of CBD. Our chewing gum is organic and made from a traditional recipe of natural rainforest chicle gum without the use of plastic or synthetic ingredients. Endoca CBD Chewing Gum is environmentally friendly and 100% biodegradable.

Normal chewing gum is a huge environmental problem. It is the world's second most common form of litter after cigarette butts and swallowed chewing gum often ends up in your toilet since it's not biodegradable and passes straight through your gut.

Ingredients

- 15mg of CBD per gum (150mg per box)
- 100% organic hemp
- Organic: Chicle gum base, xylitol, peppermint, menthol, sunflower lecithin

CBD CRYSTALS – 99% Pure CBD

99% CBD, 0% THC
Total: 500mg

Our 99% Pure Crystals are for our customers looking for maximum CBD impact.

Why is a high purity CBD product desirable? Many people are looking for pure CBD as an additive to other products such as edibles, cosmetics, or for vaping. Endoca's CBD Crystals are perfect for all of these delivery methods and can be easily absorbed under the tongue. Our extraction method uses Supercritical CO₂, free of solvents, and is lab tested.

Ingredients

- Contains 99% pure CBD
- Made with 100% organic hemp
- THC-free, fast absorption (if vaporised)
- Perfect for vaping, dabbing, using in edibles

ORGANIC VITAMINS & MINERALS

Endoca's all organic, natural, and high quality supplement range is designed by doctors and pharmacists.

We have unlocked the secrets of your genes and found a natural way to biohack your body to release its true potential.

The lack of access to quality organic food and poor diet in our hectic daily lives has led to stress, illness, and fast aging which is slowly deteriorating the human body's necessary building blocks.

To help combat these issues, we created our own unique line of Organic Raw Vitamins & Minerals together with Organic Raw Proteins, after a decade of research on how to create balance in the body and mind. Endoca's special Organic Vitamins and Minerals formula helps prevent illness as it strengthens the immune system.

HOW TO USE

Use daily in your breakfast, lunch, dinner and snacks - simple

BLEND IT
Into smoothies

MIX IT
Into oats or other food

SPRINKLE IT
Over toast or salads

SHAKE IT
Into water, nut milk or juice

"Let food be thy medicine"

ORGANIC RAW PROTEIN

**60% protein, Rich in Omega 3, Vitamin E and minerals
Total Weight 8oz (226g)**

Hemp is a high quality plant protein in terms of amino acid composition. Endoca's Hemp Protein is a light powder that's high in protein 60% with all 8 essential amino acids. It contains essential Fatty Acids – Omega 3 (including GLA) and dietary fiber. Our hemp protein is highly digestible, with >90% digestibility. Hemp protein is a valuable source of other nonessential amino acids including arginine.

Technology. Endoca Hemp Protein Powder is raw and cold milled, GMO free, and pesticide free. We use no chemicals in our 100% organic processing. Normally making proteins requires chemicals and processes that are not sustainable. We have developed after decades of R&D a way to produce clean proteins using the compressed air you breath.

Revolution. We grow hemp at our farm that is 100% organic and sustainable.

For every bottle of hemp protein you purchase, we grow 110 square feet of hemp meaning there's 110 square feet less GMO on this planet.

RAW VITAMINS & MINERALS

Concentrated Polyphenol Blend
Total Weight 3oz (86g)

Our pioneering formula combines the power of polyphenol-rich superfruits with natural fat-burning ingredients. Endoca's Raw Vitamins and Minerals help your body maintain higher energy levels, better digestion, and healthier-looking skin. It contains 30% vitamin C with the remaining 70% being comprised of vitamins, minerals, co-factors, co-nutrients, bioflavonoids, and polyphenols. All these molecules help the body to absorb the vitamins more effectively and unlock your true genetic potential thus biohacking your body to be the best version of yourself.

Endoca's RAW Vitamins and Minerals provide the most nature has to offer including:

- Maximum bioavailability
- No synthetic ingredients
- 100% Organic
- 100% Vegan
- Produced under pharmaceutical control
- Soy-Free / Sugar-Free / Artificial
- Sweetener - Free / Lectin-Free / GMO Free

WHY DO WE USE GLASS CONTAINERS?

GLASS DOESN'T LEACH CHEMICALS INTO OUR PRODUCTS

Our Salve mixture is poured at high temperatures directly into the containers you buy. We here at Endoca have always felt that pouring warm liquids into plastic was not the safest choice. While many companies are now using BPA-free plastics, our team has found new research evaluating more than 450 plastic products which has concluded that "Almost all commercially available plastic products leach chemicals that have reliably-detectable EA. In some cases, BPA-free products released chemicals having more EA than BPA-containing products."

Now, more than ever, it's clear that glass is the safest packaging choice.

GLASS IN OUR LIFE

GLASS IS FULLY RECYCLABLE

All of our containers can be recycled into new glass products over and over again. Current estimates state that only about 10% of plastic is recycled and that most plastic bottles that are recycled can't be turned into new plastic bottles. Rather, this plastic has to be "downcycled" into other lower quality products. Here is where recycling often hits a "dead end" - becoming so degraded that they can't be recycled further - and form part of a permanent waste stream.

GLASS REDUCES PLASTIC PRODUCTION

Every piece of plastic we've ever used and thrown away still exists. Every glass jar we use here at Endoca is one less plastic container created, discarded, and left filling up a landfill somewhere around the world.

GLASS IS REUSABLE

Our glass jars are safe and reusable which is why we always encourage you to find new ways to use them once you've finished your Endoca product. We suggest lining up our bottles on your window sill with little bouquets of spring flowers or use our jars to hold jewelry, a votive candle, or even your own homemade lip balm - the possibilities are endless!

JOIN THE ENDOCA FAMILY

Reward yourself and earn points with every order. For every \$1 you spend at Endoca, you will receive 1 reward point! Collect points while you shop and sign up to our reward program today for not just points but surprise discounts!

Financed by Endoca through the sale of its CBD oil online, this is a non-profit venture. Thus by choosing Endoca to buy CBD oil, customers are not only helping to heal others but also the world.

CHILDREN ARE OUR FUTURE

Endoca is committed to using its profits to help those in need, especially children. Our current Endoca Foundation work includes our hardship fund for children whose parents can't afford to buy CBD oil as well as supporting a variety of different organizations. The Endoca Foundation's long-term vision is to build orphanages where children can learn and grow in an environment of love and respect, both for themselves and the environment in which they live.

Please visit our Endoca Foundation site for more details on our collaborative efforts.
