*QUALITY TODAY - INNOVATION TOMORROW*

# CONSUMABLES
# BROCHURE

# CONTENTS

"At Micronclean, our passion is to be the first to develop new technological solutions that change the shape of the markets we serve creating quality and efficiency for our customers."

For over 35 years Micronclean has focused on contamination control products for companies in the pharma, healthcare, microelectronics, aerospace and semiconductor industries. As a result, we are incredibly proud of our cleanroom consumables range which we have sold to over 30 countries around the world in the last 5 years.

The 2019 edition of our Consumables Catalogue has been completely revamped and includes several new products such as:

- Delta Neutral Detergent in Trigger Spray, 5L RFU and Disposable Mop forms
- Non-sterile IPA alcohol in Trigger Spray form and
- Cleanroom compatible disposable socks

which have all been created to help our customer base remain compliant with changing regulations and requirements.

A large percentage of our range is manufactured in the UK under cleanroom conditions. For those products we do not manufacture we have full control of the supply chain and set the specification. Having the capability to manufacture means we are able to offer bespoke products and maintain sufficient stock levels to meet customer demand and our customer are able to audit our facilities.

For more information on any of our product lines please visit our website www.micronclean.com or contact us directly on cs@micronclean.co.uk or +44 (0) 1754 767377

## MICRONCLEAN UPDATES ITS PRODUCT LABELS TO DEAL WITH DEMAND FROM EXPORT MARKETS

FOLLOWING INCREASING DEMAND FOR OUR MARKET LEADING DISINFECTANT AND CLEANING PRODUCTS, WE HAVE HAD TO ENHANCE OUR EXISTING PRODUCT LABELS TO ENSURE THAT WE REMAIN COMPLIANT.

As a result, we have generated an enhanced label which enables us to remain compliant with labelling regulations and allows us to carry up to five languages in addition to English. Our current label can only carry two languages in addition to English. These five languages have also been logically grouped into geographic regions to enhance our ability to service our export customers.

So, the result of these changes is that the product code for our existing CleanGuard 1 IPA 500ml Trigger Spray Sterile will migrate from the current ZSAL64499 to ZSAL64499-A for region A orders, ZSAL64499-B for region B orders and so on. Note this regionalisation only affects products with active chemicals.

The new look labels with the associated regional codes for products will be rolled out progressively during 2019 across our whole consumable range.

**Regional Labels in Use**
For a UK consumable customer, the default option will always be that they order region A products and they will normally receive region A products. However, as the English language is present on all the labels and labelling regulations are common across region A-E, we might on occasion substitute the same product with a region B label for instance.

For a Micronclean customer in Turkey for instance, the product should always be ordered for region D and to comply with the local language regulations we will supply the product with region D labelling.

Although English is present on all the labels, for regions G and I the products are destined for Australia and India respectively. This is because they have to conform to a different set of labeling regulations in each of these countries and as such these products can only be sold and used in these countries.

Please note If you have any questions please do not hesitate to contact us.

| Region | Countries |
| --- | --- |
| A | UK \| France \| Spain \| Germany Portugal \| Netherlands (Flemish) |
| B | UK \| Sweden \| Norway Italy \| Denmark \| Finland |
| C | UK \| Estonia \| Greece Slovenia \| Iceland \| Poland |
| D | UK \| Russia \| Turkey \| Ukraine |

# ALCOHOLS

## THE DIFFERENCE IS CLEAR

The Micronclean unique trigger spray bottle has a range of features that make it ideal for use within the cleanroom environment.

**Integral Filtered Vent**

Validated sterile delivery for up to 12 weeks after opening

**Mechanically Tightened**

Each cap is secured with the same force to avoid overtightening while avoiding leaks

**Extended Trigger Lever**

Reduces finger stress during repeated operations

**Unique Ergonomic Bottle Design**

For ease of use

**Transparent Bottle**

Content level is always visible

**Multi Language Label**

Clear printed label removes the need for additional paperwork

**Unique Low Centre of Gravity Design**

For increased stability
