

An altogether different kind of CDMO

Open dialogue. Successful delivery.

Welcome to Pfizer CentreOne. We're the global CDMO backed by the scientific power of Pfizer. Working closely with you and your development partners, we combine our technical and commercial expertise with open dialogue, regulatory experience and global reach to help to assure project success and your next patient breakthrough.

Drug product development expertise from start to finish

Our open dialogue approach, plus decades of experience developing and manufacturing commercial drug products for Pfizer's innovators means more efficient, cost effective routes to market. Backed by Pfizer science and operational excellence, we have the experience, flexibility and scale to deliver strategic long-term API supply and effective drug product development and commercialization capabilities.

Complete mastery of drug development end-to-end:

- Clinical manufacturing
- Development of cell cultures and lab-based fermentation processes
- API synthesis
- Specialized lyophilization development and optimization technology
- Manufacturing process optimization
- Safety screening and hazard evaluations
- Chemical and analytical development
- Scale-up from pilot to commercial
- Plant scale fermentation development
- Regulatory support – pre and post-launch

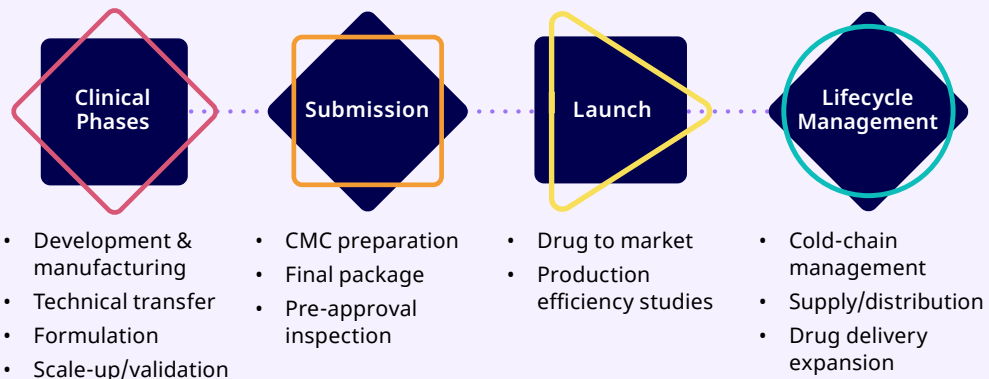

A global manufacturing network spanning 35+ sites

- North America
- Europe
- Asia

Our comprehensive regulatory submissions support has established approvals around the world including FDA (United States), EMA (European Union), ANVISA (Brazil) and PMDA (Japan).

An altogether different approach to drug development and manufacturing

Our global network delivers end-to-end development and manufacturing expertise with capabilities to take your molecule from early clinical phases through commercial manufacture and lifecycle management.

Ready to shape your therapeutic masterpiece?

There's no limit to what we can achieve together. Get in touch with our drug development and commercialization experts to start your program off on the right foot from solid ground, right from the very beginning.
