

Small Molecule Process R&D and Manufacturing

To consistently deliver value-added scientific solutions with speed and quality, while ensuring safety and compliance

Chemistry and Technologies

- Coupling Chemistry (Heck, Suzuki)
- Fluorination/Bromination
- Hazardous Chemistry
 - Azide
 - Cyanations
 - Nitrations
 - Lithium/Borane
 - DIBAL/Sodium Borohydride
 - POCl₃
- Peptides
- Pressure Reductions/Reactions (up to 25 bar)
- Chemo/Biocatalysis
- Flow Processing
- Large Scale Chromatography

Operational Capabilities

- Active across 2 sites for security of supply
- 7 Process Blocks, 240kL capacity across two site
100L to 6000L, SS, GLMS, Hastelloy
- Milling
- cGMP and Non-GMP available
- HPAPI Facility – to 1 µg / m³ (OEB 4)
- Operating Pressure: Full vac to 25 bar
- Operating Temperature: -80°C to 170°C
- World class analytical support
- Comprehensive set of analytical capabilities performed 100% in-house (nGMP & GMP)

Highlights:

- Approx. 2,800 scientists
- 450+ global clients
- Collaborations with 7 out of the 10 top pharma companies
- 74 NCE Projects
- Sales diversity - North America (60%), Europe (30%), Asia Pacific (10%)
- Over 36 independent customer audits in 2019

Formulation Development

- Salt/Co-crystal/Polymorph studies
- Solid orals, Liquids, Injectable, Ophthalmic and Semisolids
- Integrated (DS/DP) Development & Supply

- Supported by multiple state-of-the-art facilities
- A Board that continues to invest for your future needs
- A world-class scientific talent pool
- With a culture that is Safety & Compliance Always

Leading Small Molecule CRDO

Large Molecule Discovery Partner
