

BD MDS for Industry Partners

Enabling preparation and administration
of injectable drugs worldwide

BD partners with pharmaceutical companies

From the drug discovery, through the manufacturing and quality controls, the packaging and storage to the preparation and administration, BD offers reliable and innovative solutions.

From drug
discovery

BD Biosciences

- Cell sorters and cell analyzers, for high and low-end markets
- Clinical and research reagents
- Sirigen dyes
- Advanced bioprocessing

We believe in quality

We are committed to designing, developing and manufacturing **high quality products**, according to worldwide standards, guidelines and legislations, and put great effort in **evolving our processes** to meet the most stringent requirements. BD global quality policy is applied to all our manufacturing sites, design centers, legal manufacturers and sales offices.

All our manufacturing sites, distribution centers, design centers and legal manufacturers are certified according to relevant ISO standards.

Our Quality & Regulatory Business to Business Team is available to provide you all associated **documentation and support needed to register your final product.**

To the manufacturing
and quality controls

BD Integrated Diagnostic Solutions

- Microbiology solutions
- Molecular diagnostics
- Women's health and cancer
- Industrial microbiology
- Laboratory automation

BD Pharmaceutical Systems

- Glass and plastic prefillable syringes
- Safety Systems
- Self-administration injection systems

A broad portfolio
to fit your drug's
application

Disposable syringes

Conventional needles

Safety needles

To the packaging
and storage

Medication Management Solutions

- Inventory management
- Pharmaceutical preparation
- Medication dispensing and infusion
- Point-of-care verification
- Informatics, analytics and surveillance

Through the preparation
and administration

Medication Delivery Solutions

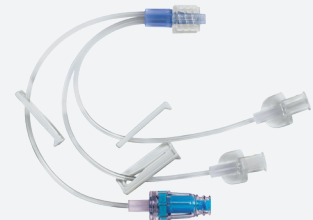

- Hypodermic needles and syringes
- IV catheters, IV sets, connectors and accessories
- BD ChloraPrep™
- BD PosiFlush™ prefilled syringes
- Hazardous drug handling solutions

Peripheral IV catheters

Prefilled saline syringes

IV sets

Needle-free connectors

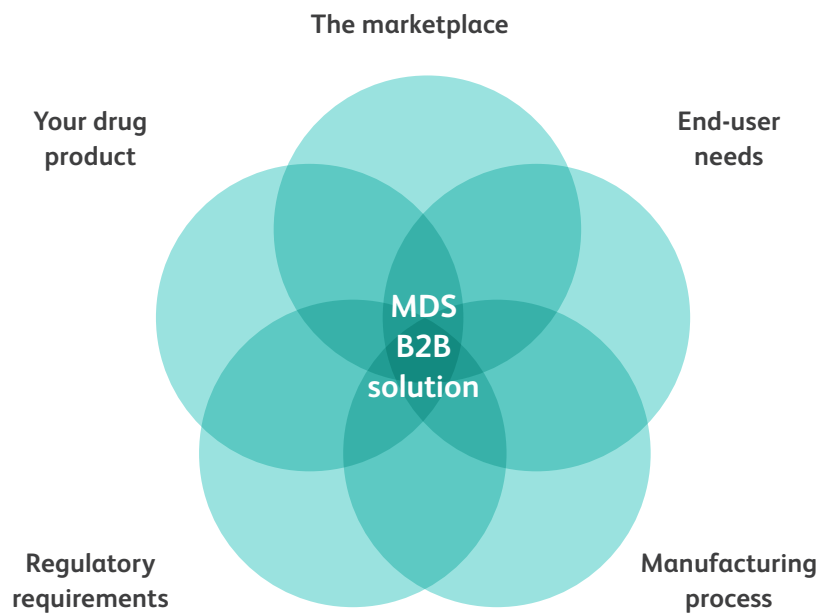

Hazardous drugs solutions

Vials access

Merging clinical and industry expertise to help you differentiate

Our vision is to enable our **customers' success** with high quality and innovative solutions for the **healthcare system** and patients around the world.

Safety inspires everything we do

Innovative

BD **products and programs** were among the first to support healthcare workers when they needed it.

We continue to create **new milestones** because we are as committed as ever to developing safer technologies.

Proactive

The healthcare industry strives to prevent illness and save lives.

For BD, that includes being **vigilant and proactive** in caring for patients and healthcare practitioners, through innovative safety reconstitution and injection technologies.

Knowledgeable

BD has amassed a important breadth and depth of knowledge of **best-in-class healthcare business practices**.

We **share that knowledge** with our practitioners, hospitals and industrial partners so they can be even more successful.

Accessible

In today's fast paced nursing environment, training and education are critical. So we strive to keep healthcare workers **informed and supported** in their day-to-day practice.

As an example, BD provides **access to training and education** to healthcare workers, from using our products to designing environments with **efficiency and safety** in mind.

Reduce impact on material usage and disposal

If 5mL syringes used worldwide could be converted to BD Emerald™ Syringes, we could potentially save up to **30%¹** of plastic from waste streams each year.
