

Lacosamide 10mg/ml (20ml Vial)

Solution for Infusion

Reference Product: Vimpat® / UCB

Description:

Lacosamide is a functionalised amino acid which belongs to the group of antiepileptics. In vitro electrophysiological studies have shown that lacosamide selectively enhances slow inactivation of voltage-gated sodium channels, resulting in stabilization of hyperexcitable neuronal membranes. Lacosamide is used as monotherapy and adjunctive therapy in the treatment of partial-onset seizures with or without secondary generalisation in adults, adolescents and children from 4 years of age with epilepsy.

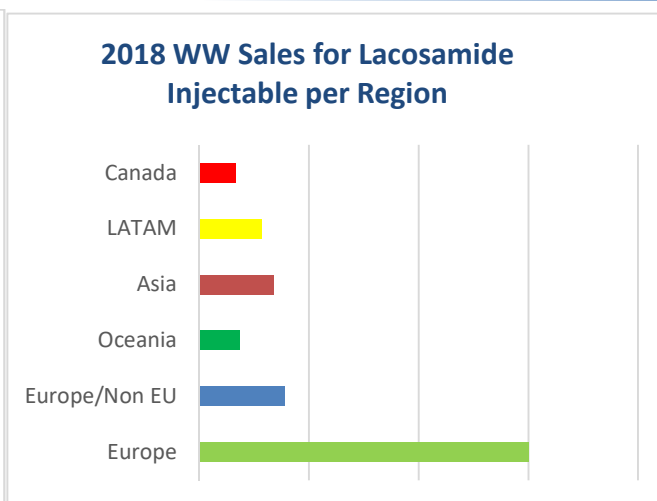

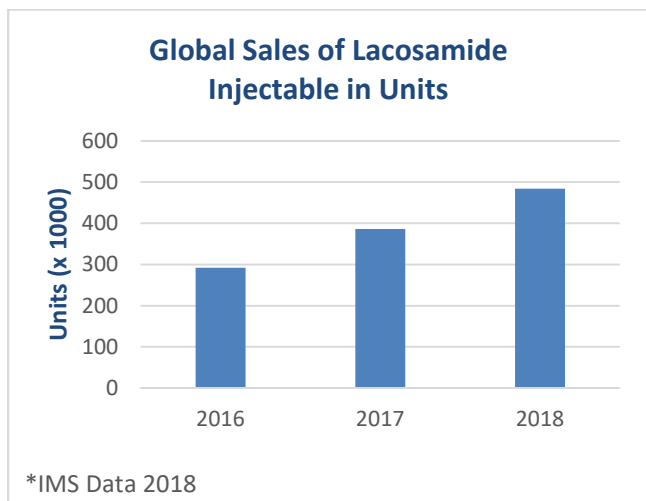

Dossier Status: On-going / EU CTD ready to file: Q2 2021

Stability Studies: Zone II / Zone IVb

Shelf life (Originator): Three (3) years

Batch Sizes: 7.766 vials

Pack Sizes: BT x 1 vial & BT x 5 vials
