

Tigecycline 50 mg/Vial

Powder for Solution for Infusion

Reference Product: Tygacil® / Pfizer

Description:

Tigecycline, a glycycline antibiotic, inhibits protein translation in bacteria by binding to the 30S ribosomal subunit and blocking entry of amino-acyl tRNA molecules into the A site of the ribosome. This prevents incorporation of amino acid residues into elongating peptide chains. In general, Tigecycline is considered bacteriostatic.

Tigecycline is indicated in adults and in children from the age of eight years for the treatment of the following infections: Complicated skin and soft tissue infections (cSSTI), excluding diabetic foot infections and Complicated intra-abdominal infections (cIAI). Tygacil should be used only in situations where other alternative antibiotics are not suitable.

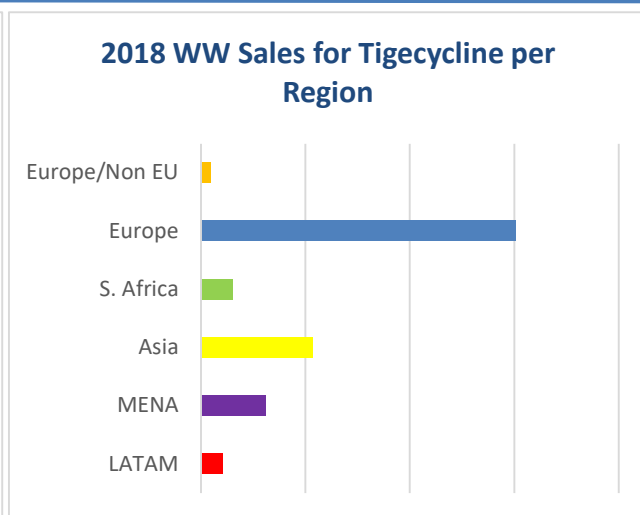

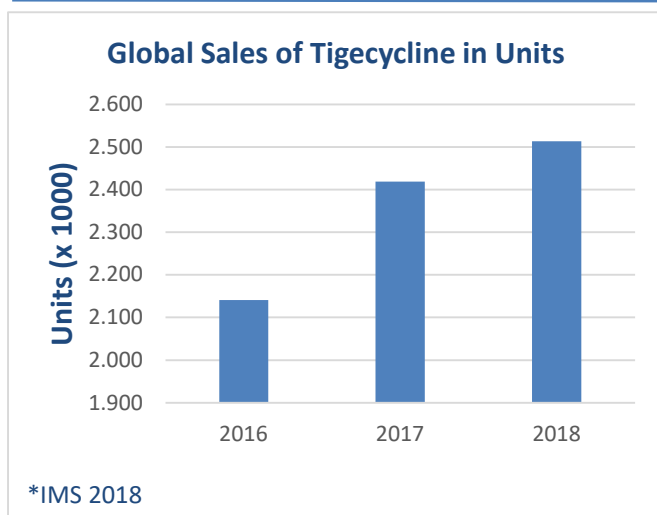

Dossier Status: EU CTD Available

Stability Studies: Zone II / Zone IVb

Shelf life (Originator): Two (2) years

Batch Sizes: 11,790 vials

Pack Sizes: BT x 10 vials
