

L-Carnitine Oral Solution

S.D. 1g/10ml Vial Oral

Description:

L-carnitine is a naturally occurring amino acid derivative present as a natural constituent in animal tissues, micro-organisms and plants. It helps the body produce energy and is important for heart and brain function, muscle movement, and many other body processes.

L-carnitine is indicated for the treatment of primary and secondary carnitine deficiency in adults and children over 12 years of age.
