

Unlock the full potential  
of your injectable product

**Rely on us.**

Development Service • Commercial Manufacturing • Packaging Solutions

**We're Vetter**

# A leading global CDMO partner for your injectable product program

For over four decades, pharma and biotech companies around the world have relied on us to put their parenteral medications on a path to success. We're proud to help our customers advance their valuable products with innovative services, cutting-edge technology, and flexible, robust, scalable processes that set our partnership apart.

**40+**

years of experience as an independent, family-owned CDMO

**80%**

of active customer projects involve complex biologic molecules.

**6000+**

employees around the world, and continuing to expand

**105+**

FDA- & EMA-approved products currently filled at our facilities

# Strategic support for every step in your product's life cycle

## Development Service

Get the flexible, customized support you need from preclinical to Phase 3 scale-up, including drug product process development, clinical manufacturing, regulatory expertise, and comprehensive analytical capabilities.

## Commercial Manufacturing

Pursue your market goals with an expert partner who offers globally acclaimed quality, deep regulatory acumen, state-of-the-art fill-finish technology, and a robust supply chain.

## Packaging Solutions & Assembly

Meet evolving patient and regulatory needs with a range of customized strategies, device assembly processes, and secondary packaging formats – all supported by our global logistics services.

Preclinical • IND • Ph1 • Ph2 • Ph3 • NDA • Approval • Launch • Life cycle

**End-to-end  
expertise**

## Development Service

# Put clinical success in reach

## Accelerate your product's development with a specialized partner

To supply your trials, succeed with regulators, and speed your innovation to patients, you need a responsive CDMO who can meet your timelines, adapt to challenges, and think ahead at every step.

We have flexible services, an expert team, and decades of experience in putting injectable products on a path to clinical success. From your first technical batches to commercial scale-up, we're here to help your product make an impact as swiftly as possible.

3

state-of-the-art clinical facilities in the US and EU

190+

active customer projects in preclinical through Phase 3

70%

of customers with clinical projects have <200 employees

### Advanced analytics

- Feasibility studies
- Compounding, pump, & filtration design
- Chemical & microbiology analysis
- Lyophilization
- Siliconization
- Regulatory compliance
- Packaging material

### Integrated processes

- Peer-to-peer project management
- Process design & implementation
- Regulatory support to streamline approval
- Method & tech transfer
- Scale-up & commercial manufacturing

### Manufacturing

- Manual filling under laminar air flow
- cGMP automated filling
- Liquids & lyophilized products in vials, syringes, & cartridges
- Clinical supply
- Primary & secondary packaging capabilities

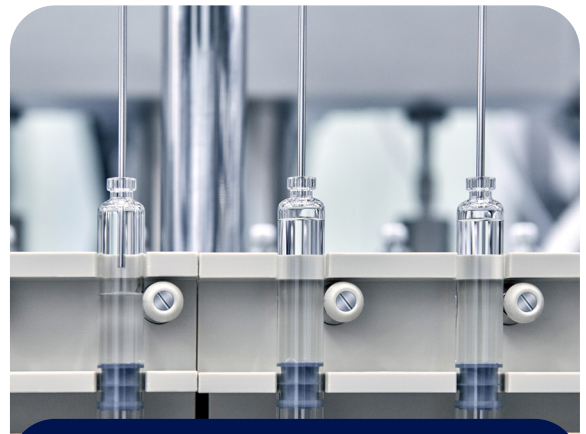

## Commercial Manufacturing

# Secure your global product supply

### Deliver the highest possible quality in every dose

We're a full-service CDMO that puts quality first at every stage of the aseptic manufacturing process — from concept, to supply chain, to the patient's side.

Leading global pharma and biotech companies trust us to sustain a high-quality global supply of their injectable medications. Ready to bring your product to the world — or even just a new market? We're here to help you reach your commercial goals.

20 state-of-the-art aseptic filling lines

- Analytical services
- Engineering & pharmaceutical production

- Dedicated customer service
- Quality control/quality assurance

Expertise at every stage

- Enhanced transparency & production monitoring
- Optimized yields & reduced batch cycle times

- Precise supply chain management
- Streamline regulatory approvals
- Guide innovative life cycle management

Fine-tuned systems & procedures

- Redundant site power supply
- High-value dedicated & disposable equipment

- A broad menu of drug delivery systems & packaging solutions
- Integrated TrackWise® quality management system

Robust infrastructure

## Packaging Solutions

# Advance your product's evolution

**Your product has life-changing potential.  
We'll help it take shape.**

In a competitive market for injectable medications, your product needs every edge it can get. With our knowledge, experience, and engineering skills, we can help you find a packaging strategy that sets your therapy apart.

### Primary packaging

#### Vials

Liquid & lyophilized

#### Syringes

Bulk & pre-sterilized

#### Cartridges

Single chamber

#### Dual-chamber

Syringes & cartridges

### Device assembly

#### Autoinjectors

Enhance compliance and convenience with one of the most popular self-injection devices.

#### Pens

Give your users a compact, discreet, and easy way to deliver your injectable product.

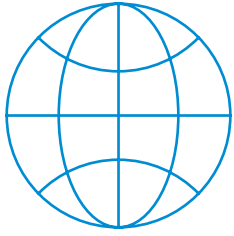

#### Safety devices

Simplify needle-stick protection with this proven syringe-based format.

### Secondary packaging

- All-paper packaging
- Blistering & cartoning
- Labeling
- Serialization & aggregation
- Testing

## Sustainability

# We're committed to stewarding our world

Responsibility runs deep at Vetter. As a globally-acting CDMO, we've committed ourselves to protecting our natural environment, the patients we supply with vital medications, and the employees who make those life-supporting products.

To uphold that duty, we maintain an Environmental, Energy, Health, and Safety program that is as rigorous as our manufacturing processes. This initiative unites our commitments to economic, ecological, and social responsibility, and guides every step of our daily operations.

# 7.3MM

kWh of renewable energy generated in 2022

# 41%

of waste generated in 2022 was fully recycled

# 57%

of supervisory roles held by women
