

CASE HISTORIES

Sterile Cephalosporins

Process optimization and regulatory upgrading of an existing product for the European market.

Corticosteroids

Development and manufacturing of processes of existing molecules for a new CEP submission.

Penicillin Antibiotics

Deep knowledge of the antibiotic market and strategic partnership for the development and manufacturing of molecules processes needed as potential alternatives to common antibiotic resistance.

CASE HISTORIES

Polyphenols

Identification of a new source for custom development and manufacturing of a product with a challenging crystallization phase and PSD specification.

Coenzymes

Identification of a partner able to develop a proprietary process and industrialization.
