

**Reliability, dedication,
quality production,
towards improving people's health**

Photographs from 1950

**One family,
one century and
one company that has
a dynamic presence
over time**

In 1934, brothers Omiros and Orestis Kolokotronis founded at Moschato the Chromatourgia Athinon E. Colocotronis Bros S.A., which was to play an important role in the industrial history of Modern Greece.

In a privately owned 20000m² area the company was initially involved in the production of chemical products. The immediate success and industrial demand at the time, lead to the decision to expand activities to other sectors like Pharmaceutical, cosmetics, cotton and veterinary products.

In 1948 Adelco focuses resources towards establishing pharmaceuticals as its main activity, and becomes a recognizable brand name and one of the fastest growing companies in Greece.

The company's dynamic entry into the cosmetics market is added to its success.

**The rise
to the top**

Times change, but the Kolokotroni brothers' work and vision remains alive. In the early 80s, Adelco-Chromatourgia Athinon E. Colocotronis Bros SA is founded under the guidance of Mr. Evangelos Kolokotronis.

"Adelco has always had a vision to help improve people's health and quality of life. Investment and constant modernization of our facilities, strict adherence to the highest ethical and operational standards, and full compliance with global regulatory authorities, is assurance that Adelco enhances its reputation as a quality and cost-effective company."

The company occupies a modern vertical EU-GMP production unit of 10000 sq.m., with 95 skilled persons, and a well-organized group of representatives internationally.

Quality manufacturing its core activity

The production and packing departments are equipped with the most sophisticated state-of the art machinery guaranteeing automated production in absolute hygienic conditions. The sterile area for the production of injections are considered to be the most pioneering in the country.

Every stage of production is constantly monitored, from the supplying of Raw Materials up to the release of the finished product, securing, simultaneously, a strict compliance policy towards the principles of the current Good Manufacturing Practices (cGMP) that run the modern pharmaceutical industry.

The aim of Adelco is continuous improvement in order to constantly provide quality pharmaceutical products to the market to improve patients' health.

 - Sunscreens
 - Foam baths

New products have already been registered and successfully distributed. Furthermore, within the following period Adelco has in the pipeline the introduction of many new products in such pharmaceutical forms and strengths that will ensure full therapeutic coverage in their category

Making our world more “beautiful”

in 1950's Adelco was the first ever company to manufacture and distribute Shampoo in Greece, with the brand OM-OR, which became synonymous with tradition, purity and dependability, since then Adelco has gained the preference and love of the consumers and introduced an extensive range to cater to the needs of Children, Women and Men.

OM-OR

Envisioning tomorrow in a globalized economy...

Against all odds, Adelco remains an independent manufacturer, based on own resources and certified EU-GMP production facility, extending activities beyond the national borders. Based on a strategy of quality products and service, commitment and support to our associates, Adelco exports for many years to countries in Europe, Africa and Asia. With focus in exploring opportunities and expanding its presence in the modern globalized environment, Adelco aims to bring to developed & emerging markets a select range of European approved Pharmaceutical & Cosmetic Products. Adelco manufacturing know-how, superior product compliance, experienced Regulatory department and developed distribution channels, allows to discuss all types of partnerships, including:

- Worldwide supply & distribution agreements
- Out-licensing opportunities
- Co-development
- Contract manufacturing.
- In Licensing / Co Marketing
