# HAND IN HAND FOR BETTER HEALTHCARE

## RENOLIT Healthcare

Your global sparring partner. Drawing on our experience with high-value polymer films, we have developed into an innovative solutions provider. In order to reach new standards, we combine innovation with partnership. Together we take healthcare to the next level.

## WHAT YOU CAN EXPECT

For more than 50 years **RENOLIT** Healthcare has cooperated in teams with customers – leading medical device manufacturers and pharmaceutical companies – to make vital contributions to human health. In a changing global environment, we embrace our responsibility for today's and future generations. We are deeply committed to transforming creative ideas into advanced, responsible market-ready solutions.

## HOW WE COOPERATE

We work together with you during all life-cycle phases of a solution. In our **RENOLIT** Healthcare Innovation Centers, we undertake intensive research and development to remain on the forefront of future-viable, high-performance polymers. We customise our solutions according to your requirements and produce them in a clean room environment, placing the utmost importance on quality assurance and control. We also provide international registration support to minimise your administrative involvement.

## HOW WE INNOVATE

Our three global innovation centers in Europe, the United States of America and China are the incubators for picking up the most current developments in order to transform them into new materials, applications and devices. Together with you, we form mixed R&D teams which lay the foundation for our goal: Together Towards Health.

With our latest achievements in the field of Extrusion Modeling Technology we can drive our industry towards greener and more sustainable solutions.

**'WE ARE YOUR STRONG  
PARTNER FOR INNOVATIVE  
HEALTHCARE SOLUTIONS.'**

TOGETHER TOWARDS HEALTH

## EXTRUSION MODELING TECHNOLOGY

Our new EM-Technology allows the development of the next generation in ultra-thin multi-layer films with unseen properties such as improved gas barrier, higher puncture resistance and advanced flexibility. This technology improves the product properties and above that, the raw material usage can be reduced significantly.

## CIRCULAR CARBON MANAGEMENT

We are constantly exploring new possibilities to enable future-viable solutions for the healthcare sector. Striving to minimise our carbon footprint, improve recycling processes and research in sustainable materials and resource-saving production cycles.

## INNOVATION FLAGSHIP AMSTERDAM

The Amsterdam Innovation Center (AIC) is the flagship of our three innovation sites. The new AIC is the place where employees of RENOLIT Healthcare and our partner companies work together beyond the boundaries of discipline, team or market unit and develop new ideas.

## SHIPPING AND QUALITY ASSURANCE

Among our five global production sites, we offer back-up production for our key products if desired by our clients. This way, challenges at one site don't hamper agreed delivery terms. We're also at your service at your production facilities to optimise your output and processes.

# OUR HEALTHCARE PORTFOLIO

**RENOLIT** Healthcare is the world's leading developer and producer of medical-grade high-value polymer solutions including films, tubes and granules. Our healthcare products are spread across five fields of application and two complementary product offers. Our services include EMT equipment leasing, custom-made formulations and tailor-made films.

## FIELDS OF APPLICATION

**BLOOD & BLOOD COMPONENTS**

**BIOTECHNOLOGY**

**PORTS & CAPS**

## SERVICES

**CUSTOM-MADE SOLUTIONS**

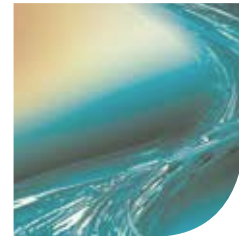

**IV & PHARMACOLOGICAL APPLICATIONS**

**DIALYSIS**

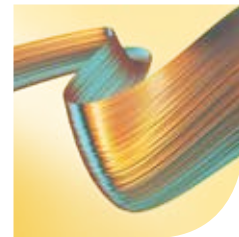

**SECONDARY PACKAGING**

**EMT EQUIPMENT LEASING**

**NUTRITION**

**TAILOR-MADE FILMS**
