

Security Label (Tamper Evident)

Shrink Tack Label

- Labeling and sealing in one label.
- STL tightly seals the cap and prevents it from coming off during transportation.
- Once the top part of the label is removed, it cannot be put back together.

- STL has adhesive, contractibility and no shape restrictions.
- You can notice clearly an unjust opening due to the adhesion breakage and the special perforation shape.

Roll Back Label

Once the carton is opened, the cut portion of the label **rolls back** to indicate that it is has been tampered with.
