

## MISSION STATEMENT

*Lyophilization Technology is an enterprise to provide scientific services and technical support for the health care and related industries. Our aspiration is the successful application and technological development of lyophilization. Our goal is the development and preparation of lyophilized products that improve the quality of life.*

*Our endeavor embraces a responsibility and commitment to those we serve, work with, and who share our aspirations:*

***To our clients:***

- skillful and competent staff, capable and helpful to provide assistance and support.*
- dedication to developing stable, high quality products, efficient processes, and effective solutions.*
- specialized facilities and equipment for conducting scientific studies and processing materials.*
- procedures and practices that assure exceptional results, quality and compliance.*

***To our staff:***

- opportunities and guidance to grow and succeed.*
- tools and training to work efficiently and effectively.*
- safety and security within a pleasant working environment.*
- compensation commensurate with contributions and achievements.*

***To our enterprise:***

- revenues for a strong financial foundation and expansion of our capabilities.*
- sufficient profits to subsidize basic scientific studies and investment for future growth.*

***To our associates in industry:***

- provide a better understanding by publishing our discoveries for educational purposes.*
- engage in research for greater knowledge and promote technological developments.*
