

WE COMPOUND

WHAT OTHERS DO NOT COMPOUND

BECAUSE WE CARE

WE SOLVE...

The Wittenburg Group is a qualified medical compounder designing and manufacturing soft thermoplastic elastomers and speciality engineering plastic compounds. The Wittenburg Group has a strong presence as a supplier of polymer compounds to highly regulated and risk adverse markets such as medical devices, pharmaceutical packaging, food packaging and drink water contact. It produces products for these markets under the ISO 13485 quality system. The Wittenburg Group has the capability to design and manufacture complex and demanding engineering plastic compounds using over 30 base polymers. These high-end engineering plastic compounds are used in the automotive, transportation, aviation, electrical / electronics, industrial, medical and consumer industry sectors.

WHAT OTHERS DO NOT SOLVE

For over 100 years the Wittenburg Group has built a strong international reputation when it comes to technical achievements, innovation, quality and reliability. The company group is based on a strong research & development ethos which allows delivering technical solutions for highly regulated markets. With production sites in China and Europe the Wittenburg Group has the flexibility to support customers worldwide with dedicated compounds in batch sizes from 10 kg to full container loads.

BECAUSE WE CARE

WHAT ARE OUR CORE STRENGTHS

- **Co-creation; customised to your needs**
- **Global support network and supply risk management**
 - But Local Sales
 - Pilot lines, R&D and lab centers
 - Supportive Quality Systems
- **Minimise and manage risks for human beings**
 - Product Safety Support, Product Stewardship and Regulatory Support
 - Medical Quality Systems: ISO 13485
 - Lab Capabilities
- **Know-how and passion and the dedication to help you**
- **We solve problems others do not solve**

STATE OF THE ART MEDICAL PRODUCTION INFRASTRUCTURE AND QUALITY

TRUSTED COMPOUNDS FOR HEALTH CARE

Wittenburg BV is a qualified medical compounder designing and manufacturing soft thermoplastic elastomers and speciality engineering plastic compounds under the brand name Wittenburg, using ISO 13485 quality system. Wittenburg has a strong presence as a supplier of polymer compounds to highly regulated and risk adverse markets such as medical devices, pharmaceutical packaging, food packaging and drinking water. All Cawiton grades are designed and developed by the experienced R&D team, in close cooperation with the customers tailored to their specific needs.

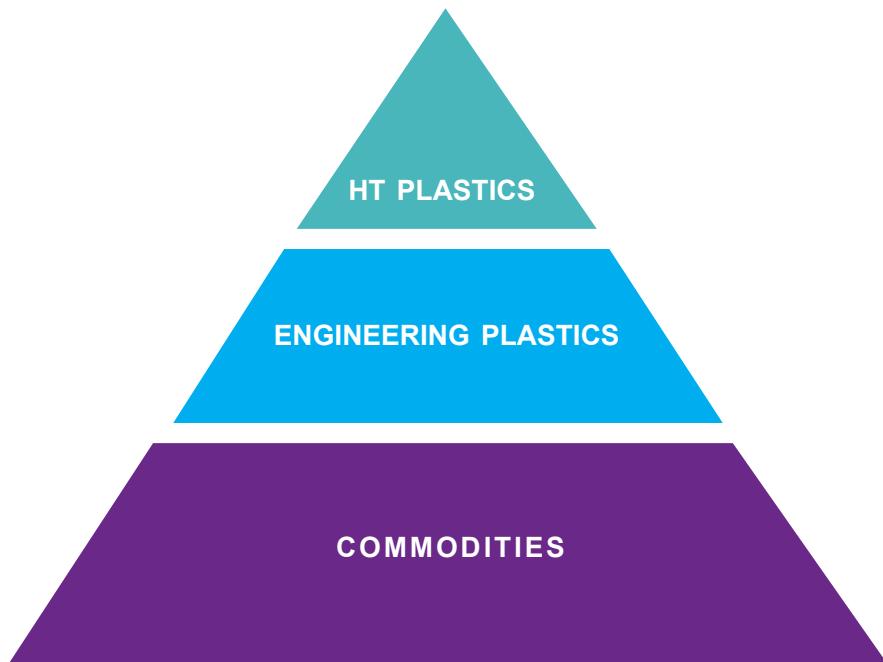

WITTENBURG

Cawiton grades from Wittenburg are used by our customers to manufacture:

- **infusion bags**
- **medical tubes**
- **medical stoppers & closures**
- **syringe gaskets**
- **catheters**
- **pharmaceutical packaging**
- **airway management applications**
- **soft medical grips**
- **medical wire & cable**
- **medical housing and medical analysis equipment**

You can find more information about the medical grades on our website: www.wittenburgbv.nl

WITCOM PRODUCES UNIQUE POLYMER COMPOUNDS BY THE MODIFICATION OF MORE THAN 30 BASE POLYMERS, FROM COMMODITIES TO HIGH PERFORMANCE, HIGH TEMPERATURE POLYMERS.

WE PUT OUR CREATIVITY IN OUR GRANULATE TO HELP YOU INNOVATE

UNIQUE COMPOUNDS FOR DEMANDING APPLICATIONS

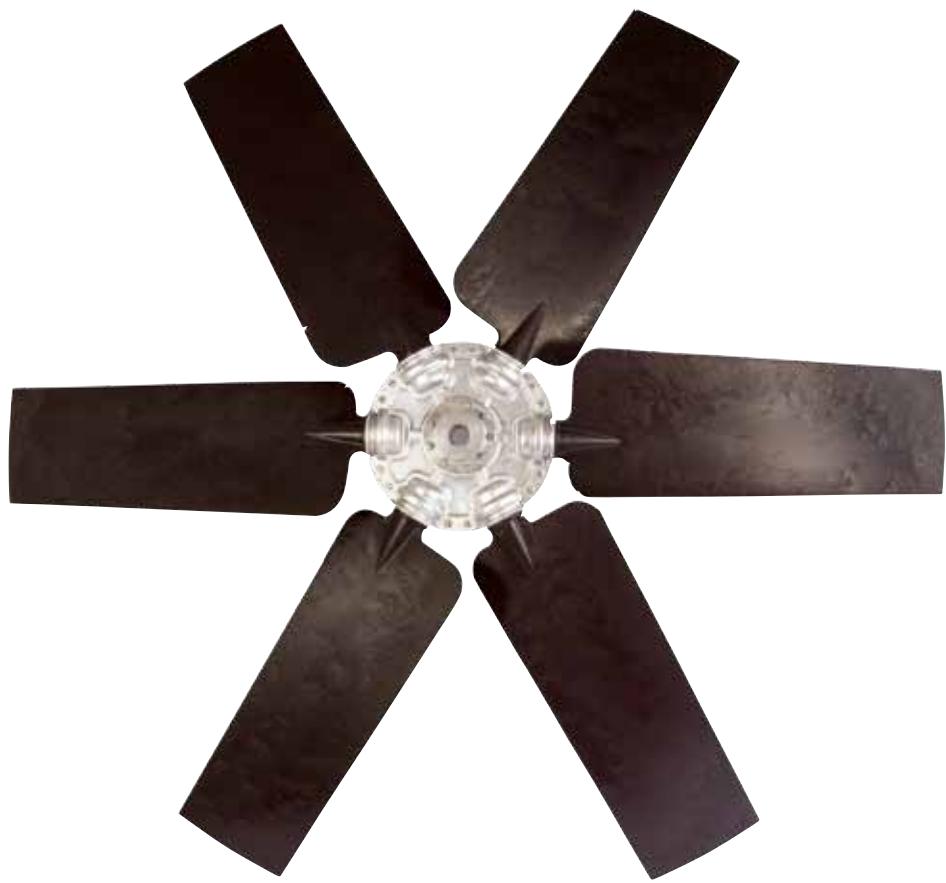

Witcom has the capability to design and manufacture complex and demanding engineering plastic compounds for the automotive, transportation, aviation, electrical / electronics, industrial, medical and consumer industry sectors. With its specialised production equipment Witcom is able to produce unique compounds under the brand name Witcom. Using a vast range of reinforcements, fillers and additives such as carbon fiber, glass fiber, minerals, and lubricants, Witcom produces a wide range of functional polymer compounds. Witcom has dedicated production facilities with the required quality systems to support production and testing of products for high-end and regulated markets. The Witcom R&D team is passioned to design polymer compounds for you.

Witcom grades are used for applications requiring:

- Internal lubrication
- Electrical conductivity
- Heat conductivity
- Food detection
- Radar absorption
- Drink water approvals
- Medical approvals
- Customised specialities

You can find more information about our highly specialised engineering plastic compounds on our web site: www.witcombv.nl

YOUR PARTNER IN TPE, MEDICAL AND FOOD CONTACT AND SPECIALITY
ENGINEERING PLASTIC COMPOUNDS

XUNFENG THE CHINESE MEMBER OF THE WITTENBURG GROUP

Xunfeng uses proven polymer compounding technology and quality systems to support the Chinese market and global customers producing in Asia. Medical compliant compounds are sold under the brand name “Cawiton” and specialised engineering plastic compounds under the brand name “Witcom”. Xunfeng has several production lines and a fully equipped quality control lab. High quality and fully qualified polymers are used. Customers are supported by a dedicated local Chinese speaking sales team. Xunfeng is focussed on minimising and controlling any risk customers and end users could have regarding the functionality and performance of their products.

Xunfeng:

- **Uses proven technology**
- **Local Chinese team**
- **Trustworthy compounds for medical applications**
- **Highly specialised engineering plastics**
- **ISO 9001: 2008**
- **Risk management**

You can find more information about our medical and highly specialised engineering plastic compounds on our web site: www.zhxunfeng.com
