

- 2020+ Started establishing strategic partnerships with **prestigious stakeholders**.
- 2019 We have received a **European Commission** grant under the EIC Accelerator pilot program.
- 2019 We have been qualified as an **Innovative Start-up** in Italy.
- 2018 We have being granted a patent in **8 EU countries**.
- 2017 **Founding** of the company.

## Who we are

We are an **innovative Italian Start-Up** bringing breakthrough innovation to the industrial filtration and drying industry. Thanks to our patent protected novel technology, our strong business partnerships in place and our highly skilled and dedicated team, we are on track to disrupt the way that the **industrial filtration** and drying of specialty compounds (such as APIs) is performed in many **different sectors** starting with Pharma, Chemical and Food & Beverage. Although we are a young start-up, we have already achieved some sound first wins.

## Contacts

Via dei Laghi 74, int. 2

SIMPLICITY IN EXCELLENCE

## PRESSING

Mechanical pressing significantly increasing filtration effectiveness.

## WASHING

Uniform washing capability highly reducing the volumes of solvent used.

## DRYING

Drying by direct contact offering unmatched productivity.

# What we do

WE DEVELOP **INNOVATIVE PROCESSING** EQUIPMENT INTENDED FOR APPLICATION IN INDUSTRIAL FILTRATION/PRESSING (P), WASHING (W) AND DRYING (D) OF SPECIALTY COMPOUNDS.

WE TAILOR OUR PWD TECHNOLOGY TO THE NEEDS OF **DIFFERENT TYPES OF END PRODUCTS**, FROM ACTIVE PHARMACEUTICAL INGREDIENTS (APIs) THROUGH CHEMICAL PRODUCTS (FINE CHEMICALS) TO VARIOUS COMPOUNDS IN THE FOOD INDUSTRY.

WE OFFER **EXTENSIVE BENEFITS** TO THE USERS OF OUR PWD TECHNOLOGY BY SIGNIFICANTLY ENHANCING THEIR OPERATIONAL EFFICIENCY AND EFFECTIVENESS WHEN IT COMES TO INDUSTRIAL FILTRATION, WASHING AND DRYING OF SPECIALTY COMPOUNDS.

WE WORK CLOSELY WITH OUR **STRATEGIC PARTNERS** (BOTH ACADEMIC AND INDUSTRIAL) WHEN IT COMES TO TAILORING OUR EQUIPMENT TO THE NEEDS OF THE PRODUCTION LINE OF THE USERS.

# Our values

We strive to excel and to exceed expectations as **individuals** and as a **company**. This extends to our technology that excels when it comes to **operational performance**, to value creation and to ease of operation.

To assure excellence, we need **precision**. The Precision of our technology mirrors the precision with which it was designed and developed. Every single component and every single process of our technology has been carefully assessed to the slightest detail to assure its perfect operation translating into **top-class** performance, **reliability** and **quality**.

The excellence and precision require focus. Being tuned in to the needs of **our clients** is how we work and how our technology operates. To achieve that we focus on the **long-term** relations with our clients while our technology focuses on delivering the best-in-class performance when it comes to: **Pressing/Filtration, Washing and Drying**.

Simplicity is a key to achieve excellence, precision, and focus. The industrial filtration and drying process is as complex as it gets and we proud ourselves in **breaking this complexity and effectively simplifying it**. It is not only reflected in the structures of our organization but also in the simplicity in which **our technology functions**.
