

We are specialists in multilayer flexible films and foils production, lamination, rotogravure and flexographic printing for pharmaceuticals and food products.

## COMPANY PROFILE

---

We are specialist in manufacturing and printing (rotogravure and HD flexography) of all kind of multilayer films and foils, for Food, Pharmaceuticals and Industrial flexible packaging. Beside the print, we can provide lamination (solvent-free, solvent-based, and water-based), and every kind of coatings, partial registered or full coverage (cold seal, antifog, high gloss).

# STRENGTHS

---

We have two manufacturing sites, and a responsive and dynamic structure to offer you production costs adjusted to current requirements, and great flexibility for small and big series with reduced delivery times.

Professionals with broad experience in flexible packaging market. Production in Clean Rooms Certified ISO-8 with high-tech equipment's.

We are a reliable financial company, with the support of some particular investors. The great flexibility on small runs and short delivery times are among our differential characteristics.

# PRODUCTS

## We adapt to our customer's specifications

Our factories have been designed thinking in the pharmaceutical market. All the production processes are performed inside clean rooms, with ventilation systems equipped with H13-type absolute filters, to ensure the complete absence of external contaminants.

We make all kind of flexible materials need for primary packaging of Pharmaceutical, Veterinary, Hygienic, Cosmetic, Food and Consumer Products.

We can adapt any material to your present product specification, and we can propose improvements in your current structures to get cost-savings and/or better performance in terms of machineability, barrier properties, appearance or easy to use for end-user.

## PHARMACEUTICAL AND COSMETIC PRODUCTS

Heatsealable Aluminium for Blisters.

Paper, Aluminium and Polyethylene complex for monodose sachets of powder or granulate products.

Polyester or Paper complex with Aluminium and Polyethylene for cream and liquids sachets.

Aluminium and Polyethylene complex for suppositories and clinical packs.

Sterilizable films.

## CONSUMER GOODS

### 1 Monofilm (Pastry, Promotional Strips and Multipacks).

- Polypropylene
- Coated Paper

### 2 Layers complex (Meat and Cheese, Snacks, Rice and Pasta, Air fresheners, Chocolate).

- Polyester/Polyamide + Polyethylene
- Polypropylene + Polypropylene
- Polypropylene + Polyethylene with barrier
- Paper + Polyethylene /Polypropylene

### 3 Layers complex (Tea and Confectionary, Coffee, Ingredients, Pet food).

- Paper + Aluminium + Polyethylene
- Polyester + Aluminium + Polyethylene
- Polyester + Polyester Metallized + Polyethylene

### 4 Layers complex (skin cream samples, magazine samples, sterilizables).

- Polyester + Aluminium + Polyester + Polyethylene

We can also produce sustainable materials according to ISO 14432 (OK Compost Home and Industrial) and ISO 14430 (Ready to Recycle - 100% monomaterial)

## TECHNOLOGY AND FACILITIES

We apply high tech on our production processes

---

With a surface area of more than 15,000 sq. metres, our two manufacturing plants are perfectly suited to developing all the stages of our production process: printing, laminating and final slitting on reels. In order to offer to our customers a maximum quality, we have industrial equipment state-of-the-art, which give to us the maximum safety on all our processes, including Clean Rooms ISO-8 Certified (former 100.000 Class).

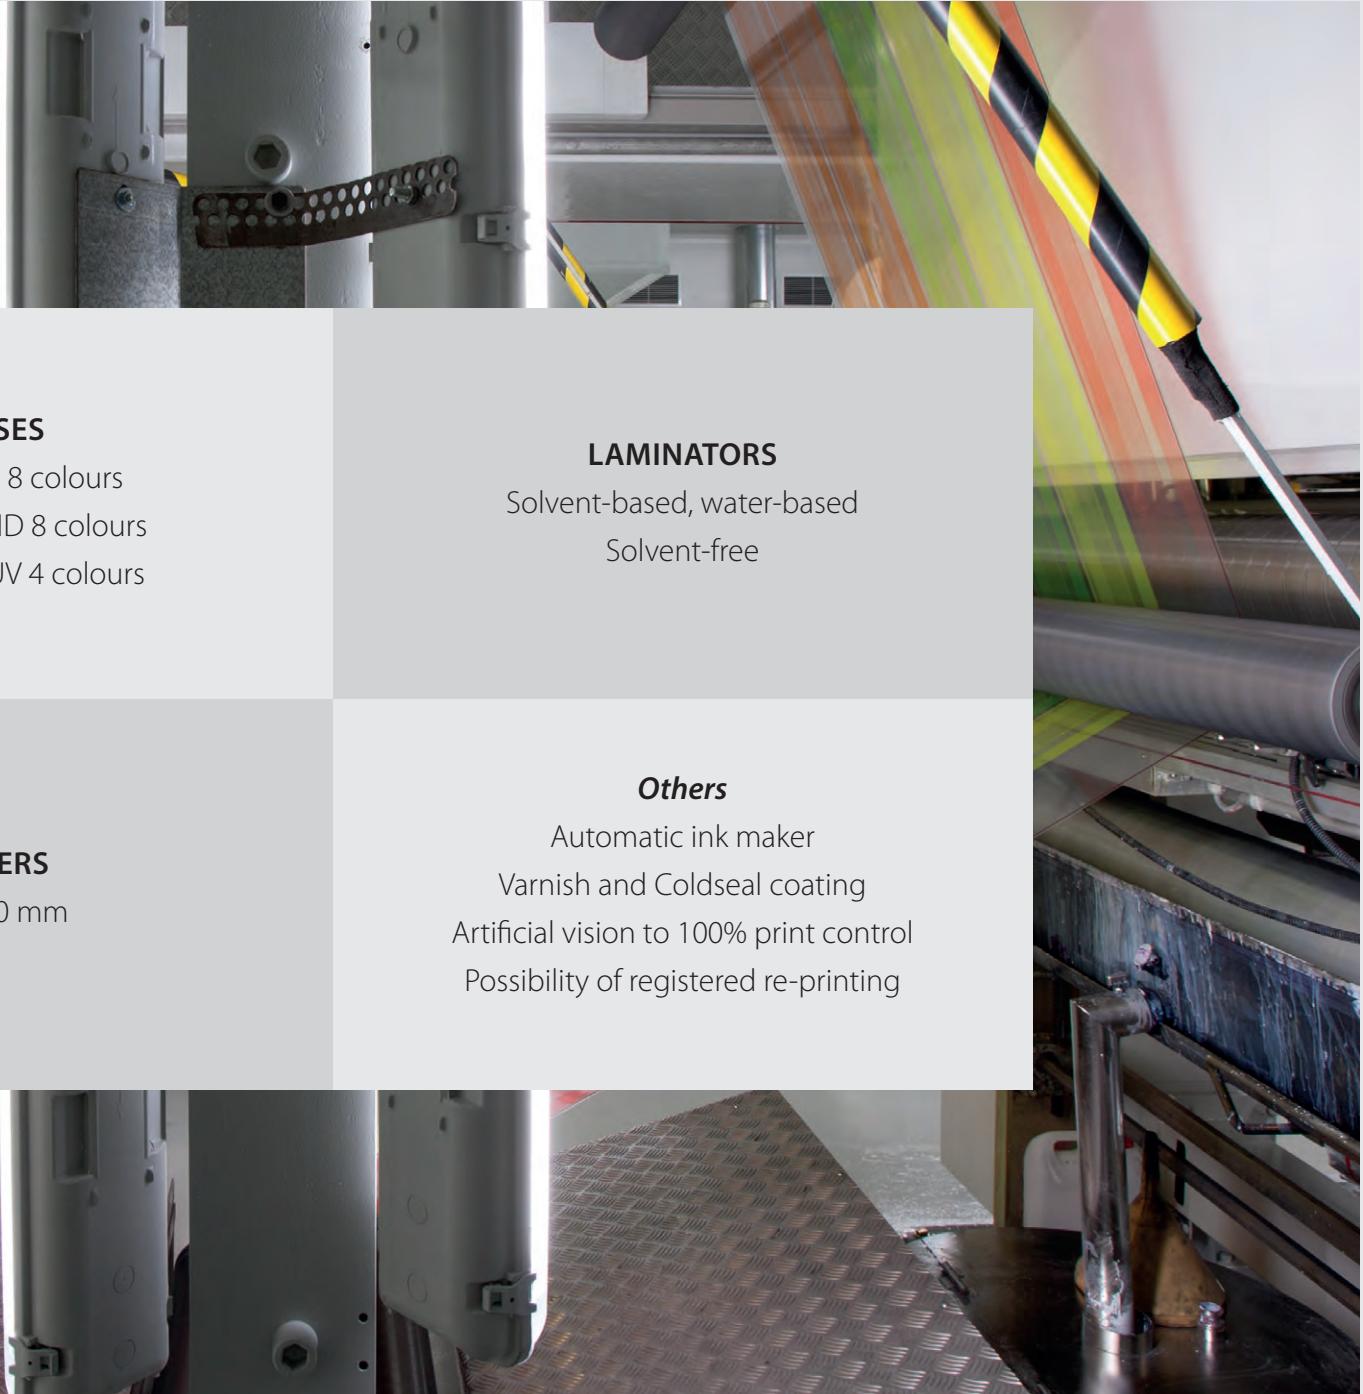

## PRESSES

Rotogravure 8 colours  
Flexography HD 8 colours  
Flexography UV 4 colours

## SLITTERS

3 x 1.200 mm

## LAMINATORS

Solvent-based, water-based  
Solvent-free

## *Others*

Automatic ink maker  
Varnish and Coldseal coating  
Artificial vision to 100% print control  
Possibility of registered re-printing

# PRINT SYSTEMS

Gravure and HD Flexography

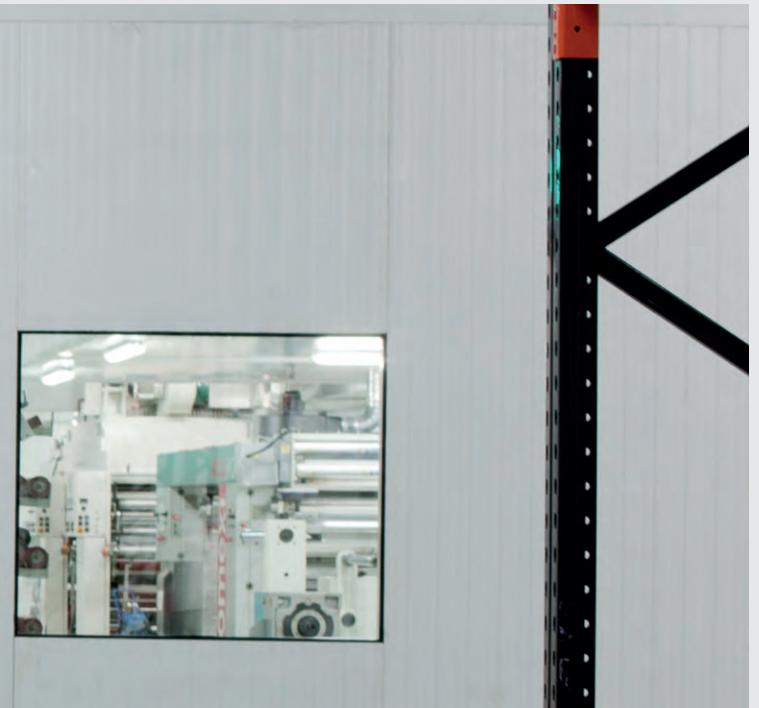

# QUALITY

## We take care extremely about the process quality

We look after the quality of the products that we make, with the maximal attention. We are pioneering in Spain certifying our Quality System with the norm ISO 15378 (9001+GMP), which evidences our vision of the future, as well as continuous technological innovation and improving.

We have got also the BRC Certificate, recently renewed with the highest qualification, AA. We deliver all the materials according to customer's specifications, fulfilling the corresponding Certificate of Analysis, and we can establish Concerted Quality agreements if our customers ask for them.
