

## SUPPORTING YOUR JOURNEY TO MARKET

# UNPARALLELED QUALITY THROUGH DESIGN, DEVELOPMENT AND MANUFACTURING EXCELLENCE.

### You have ideas for empowering patients and improving lives. We can help.

Phillips-Medisize, a Molex company, has extensive experience collaborating with companies to develop drug delivery, diagnostic or MedTech devices end to end, from design to a final manufactured product — quickly and efficiently.

#### End-to-end Capabilities

We bring the right experts, agile processes and technologies together to optimize design, development and manufacturing, so you can collapse your supply chain and get into the market quickly. Technology transfers are minimized with quality and regulatory compliance guaranteed.

#### Commitment to Quality

We will continuously perform ongoing evaluations to ensure the highest level of quality is maintained throughout our facilities, including our clean room manufacturing. Our robust processes and highly experienced teams enable us to produce quality deliverables for our customers, time and time again.

#### Connectivity Technology

As a subsidiary of Molex, a leading global supplier of interconnect systems and componentry across industries, we can provide enhanced capabilities that integrate electronics, low-cost connectivity, software and data solutions to create a connected ecosystem for your product.

#### Partner of Choice

As your needs and healthcare market requirements evolve, you can depend on us to grow with you, from ideation through commercialization. We have been partnering with companies like yours for more than 56 years.

## CREATE THE RIGHT SOLUTION — WELL BEYOND TODAY'S STANDARD PRODUCTS — THAT CAN MAKE A MEANINGFUL DIFFERENCE FOR PATIENTS

#### DRUG DELIVERY PRODUCTS

Our design and development teams work closely with you to choose the right technologies and apply usability and human factors engineering to develop a high-performing device.

Best Innovation In Drug Delivery: 2019 Pharmapack Awards

Excellence in Pharma Drug Delivery Devices: CPhI Pharma Awards

Each year, we produce hundreds of millions of commercially successful drug delivery devices for pharmaceutical and biotech companies of all sizes

We give you a head start and reduce risk to your drug delivery device projects

We cover all the steps — from an idea on paper to a complex regulated drug delivery service

#### COMBINATION PRODUCTS

Our integrated solutions — including drug and reagent handling, cold-storage solutions, assembly, final packaging and serialization — help you collapse your supply chain and optimize the process for combination products

Greater Suzhou Best Employer YCHP — Great Contributor on Industrial Output and Import/Export: SIP

We partner with companies to develop a wide range of innovative combination devices, from needle-based injection systems to wearable injection technologies

We help bring your combination products to market faster

#### PRODUCT SHOWCASE

### A Reusable Smart Auto-Injector

By leveraging our decades of experience in designing and manufacturing MedTech devices and injection systems, we fused reusable technology with the simplicity of disposable devices into a connected auto-injector. The auto-injector is a smarter device for better support:

- Small, intuitive and easy to use for patients
- Powerful and flexible platform for pharma
- Better for the environment
- Ready for the Connected World

#### CONNECTED HEALTH SOLUTIONS

Our connectivity platform enables you to develop connected combination devices and digital interfaces for improved disease management and outcomes

Best Overall Connected Health Solution: Medtech Breakthrough

Working together, we helped one client bring a "first" to market: An FDA-approved drug delivery device utilizing a connected health system.

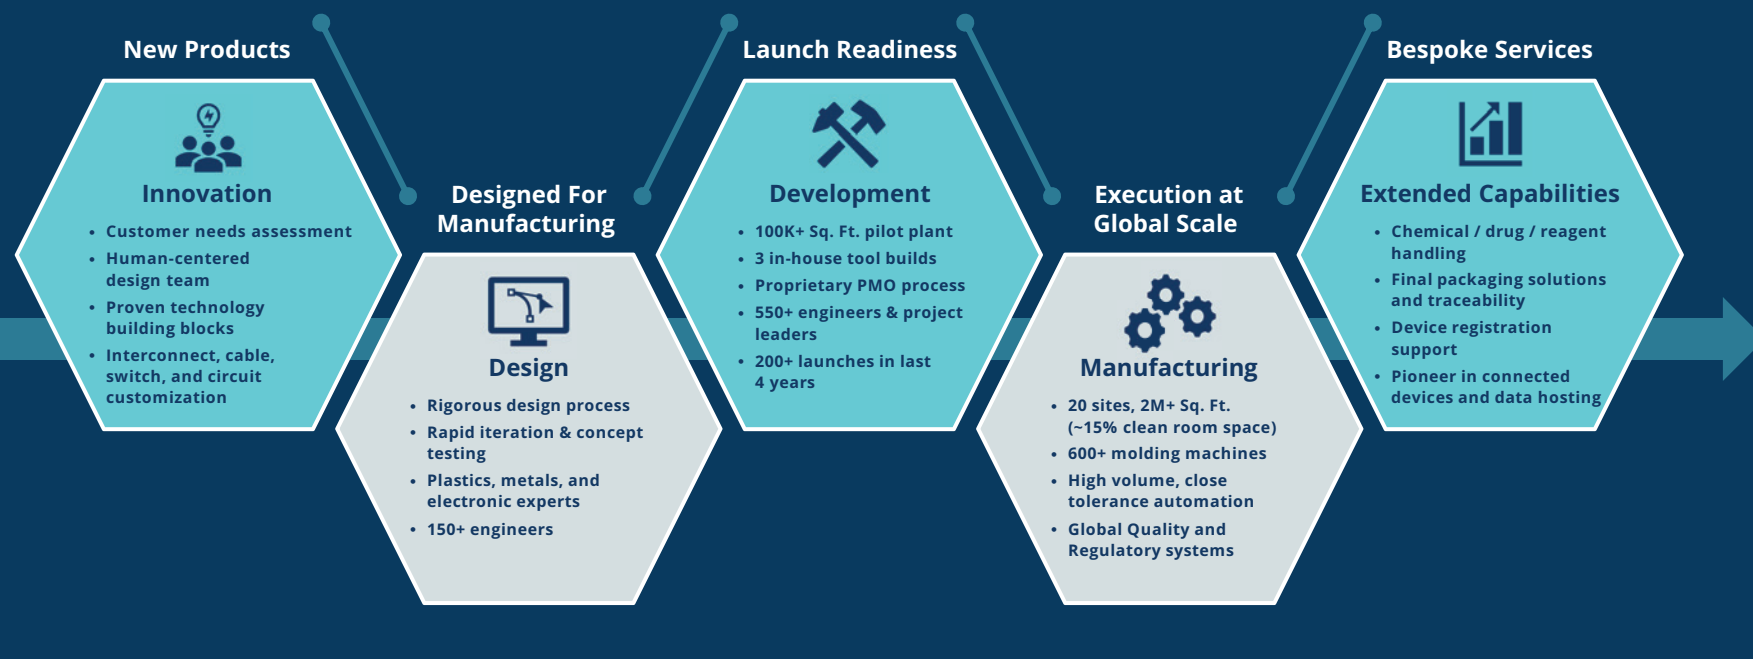

We help you across the digital ecosystem

## A CONTINUUM OF CAPABILITIES

Engage us at any stage in the development of your solution — from early ideation through manufacturing — and you'll benefit from our integrated approach. Wherever you are today, we will meet you there and take you where you want to go.

### UNIQUE END-TO-END CAPABILITIES

### DELIVERING THE BEST OUTCOMES FOR CUSTOMERS

OUR END-TO-END APPROACH TO DESIGN, DEVELOPMENT AND MANUFACTURING

## GLOBAL REACH AND RESOURCES

Backed by the combined resources of Molex and its parent company Koch Industries, Phillips-Medisize is a global company of more than 6,000 professionals with expertise and experience in innovation, product development, manufacturing, tool build and new product introduction. We are ready to serve customers across the globe.

**INNOVATION & DEVELOPMENT**

- R&D centers in U.S., Europe, and Asia
- 700+ technical staff
- 3 tool building sites
- 200 innovative programs launched in the last 4 years

**MANUFACTURING**

- 20 production facilities throughout Americas, Europe, and Asia
- 6,000+ employees in production and quality
- 2,000,000+ Sq. Ft. of manufacturing space
- 350,000+ Sq. Ft. in Class 7 & 8 clean rooms
- 600+ molding machines
- 170+ custom assembly lines
- 25+ circuit board mfg. lines
- 7 MIM furnaces
- 7 MAG molding machines
- Electronics Integration Sites
