

BuddyDrops

Long-lasting moisturizing
eye drops for your pet.

Keratoconjunctivitis sicca or dry eye

Keratoconjunctivitis sicca or dry eye - is a condition that causes inflammation of the cornea and surrounding tissue from drying out. It is a common eye condition resulting from inadequate production of the aqueous portion of the tear film by the lacrimal gland and/or gland of the third eyelid.

Symptoms

- 🐾 Red irritated eyes.
- 🐾 Discharge of mucus or pus from the eye.
- 🐾 Rubbing the face and/or eyes.
- 🐾 Closing the eyes or blinking more than usual.
- 🐾 Eye infections (that comes back quickly after treatment).
- 🐾 Eye ulcers.
- 🐾 The appearance of dark spots or pigmentation of the

What is Buddydrops?

It is a long-lasting moisturizing and lubricating eye drop that helps to moisturize and maintain your pet's eye hygiene.

Thanks to a unique combination of ingredients and sustained release technology, BuddyDrops remain on the surface of the eye for a long time, reducing the need and frequency of reapplication.

- ✓ Ectoine
- ✓ Hyaluronic acid
- ✓ Carboxymethylcellulose
- ✓ Long - lasting effect

Ingredients

Ectoine

- 🐾 A natural molecule with moisturizing and stabilizing properties.
- 🐾 Create a protective barrier against allergens.
- 🐾 Avoid the evaporation of the water layer of the tear.

Hyaluronic acid

- 🐾 Moisturize.
- 🐾 Increase tear residence time.

Carboxymethylcellulose

- 🐾 Lubricates.
- 🐾 relief from burning irritation.

BuddyDrops

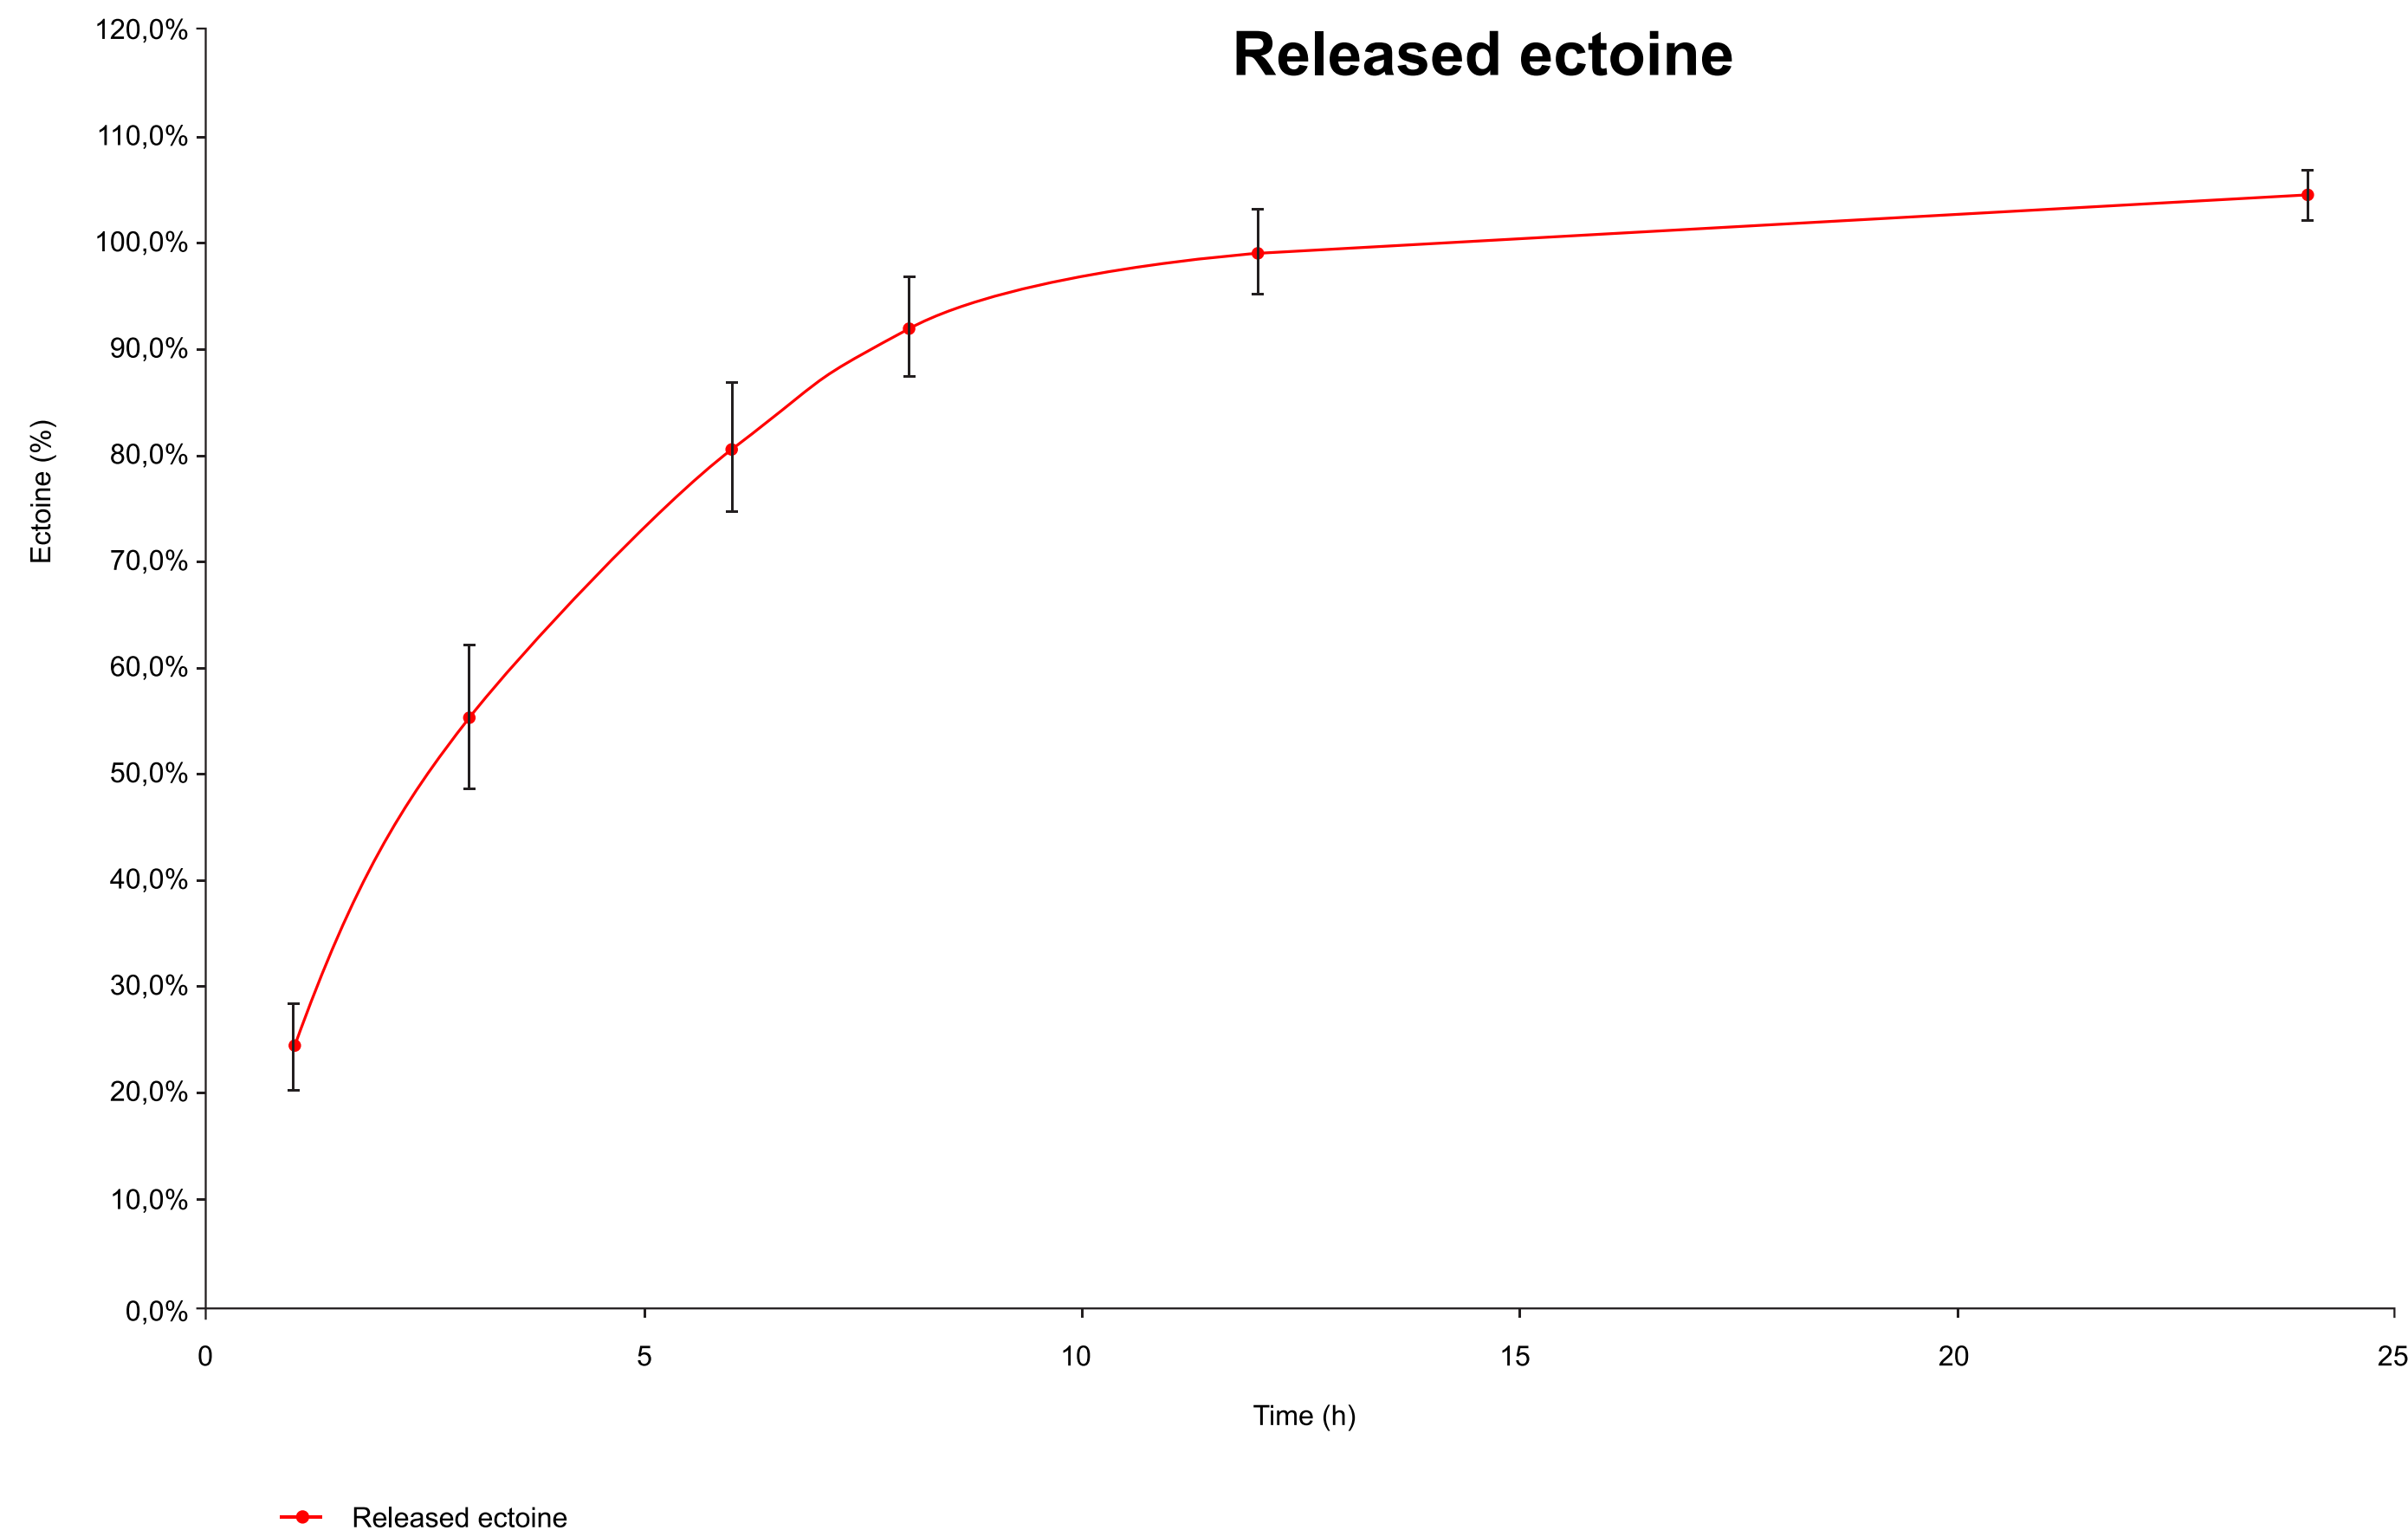

- ✓ Relieves dry eyes.
- ✓ Forms moisturizing and lubricating layer.
- ✓ Long-lasting moisturization with fewer applications.
- ✓ Premium daily hygiene.

Properties and indications

- 🐾 Relieves dryness of the eyes.
- 🐾 Alleviates eye irritation.
- 🐾 Protects against external allergens, alleviating symptoms.
- 🐾 Supplements and stabilizes the tear film.
- 🐾 Suitable for regular eye hygiene.
- 🐾 Eye cleaning prior to any type of ocular examination.
- 🐾 Easy to use.
- 🐾 Well tolerated and safe.

How Buddydops acts?

Due to the rheological properties of both Hyaluronic Acid and Carboxymethylcellulose, the combination of both polymers in BuddyDrops acts synergistically increasing the retention time of the drop on the ocular surface.

This allows the Ectoine to be released in a sustained way and moisturize, repair tear film and protect the mucous membranes.

Thanks to this technology, a long-lasting moisturizing effect is provided, which reduces the frequency of instillations.

Posology

It is administered topically using an ophthalmological route.
The dose: 1–2 drops in each eye, as many times as needed.

Mode of use

- 🐾 Wash your hands before applying the drop.
- 🐾 Raise the animal's head up and pull down the lower eyelid.
- 🐾 Apply 1-2 drops in the conjunctival sac and massage gently so that the product is distributed over the entire ocular surface.
- 🐾 Do not touch the tip of the dropper with the eye, skin or hands.
