Luer Vial

New, standardised application system for pharmaceutical substances

The modular Luer Vial packaging and application system by GEMÜ allows a single-handed operation and additionally an extended storage life of permeable substances.

Advantages

- Single-hand use
- Primeless, ready to operate
- Low residual volume
- Use in all positions
- Modular design
- Adaptable spray performance
- Preservative free option

Specifications

- COC Polymer
- Volumes 0.2 – 0.6ml
- Multilayer closure foil
- Standard or aseptic filling procedure
- Unbreakable / glass free
- Sterilizable

Technical

- Cost effective
- Excellent barrier properties
- Permeability stable
- Extremely low extractable profile
- Long shelf life
- Standard filling and sealing process
