

COMPANY PROFILE

The corporate group Ananta Medicare specializes in manufacture and marketing of high-quality generic medicines, food supplements and herbal products.

The corporate group Ananta Medicare includes own plants located in India and registered offices in Europe (United Kingdom), Asia (India) and the CIS (Ukraine).

The company was founded in 1999. Over the years of successful work in the pharmaceutical markets the company's products have earned confidence of both patients and physicians of different countries.

Nowadays the purpose of Ananta Medicare is an expansion of sales markets in different regions of the world.

PRODUCTION ACTIVITY

Food supplements and herbal products

The products are manufactured at own plants and under the contract in Italy and India.

The process of manufacture complies with international GMP, ISO 9001, ISO 22000 standards and ensures the quality of products.

The first plant of Ananta Medicare specializing in the production of food supplements and herbal products began work in 2015. The products are manufactured in the form of tablets, capsules, syrups, lozenges, powders, creams/gels, ointments and other dosage forms.

Medicinal products

The second plant of Ananta Medicare began work in 2020. The plant produces parenteral cephalosporins.

The third plant will be launched in 2021. The plant will specialize in tablets, capsules, lyophilized and liquid injections.

The total area of the plants producing medicinal products is about 30,000 sq. m.

Manufacturing and quality control systems of these plants have been designed in compliance with PIC/S GMP requirements, such as MHRA, FDA etc.

The company's work is aimed at:

- support of innovations in development of products with special attention to modern medical needs;
- manufacture of quality products;
- gain in health of different population groups with different income and needs.
