

# Alfa Omega

Production of  
Food supplements,  
Probiotics, Medical devices,  
Cosmetics, Homeopathic  
and Veterinary products

## About us

The company was born in 1995 with the goal of complementing traditional medicine with phytotherapy and homeopathy. In our collaborations with third parties, we have always provided products with the highest **quality** and **safety** standards. During the years we have become a point of reference in the Italian market not only for homeopathic products, but also in the nutraceutical, medical and cosmetic fields.

## Our values

Every employee is respected and valued as a member of our family, and every one of them contributes to the company's success. We take the best care of our business through hard work and team spirit.

## Our team

Our staff consists of highly qualified biologists, chemists, biotechnicians, pharmacists who work in compliance with the most recent GMP and EU Directives and closely collaborate on all our projects, from start to finish. The manufacturing process is supervised by highly specialised and experienced workers.

# Our strengths

## FLEXIBLE PRODUCTION

We aim at meeting your needs concerning your production, both in small and big quantities.

We use our expertise and flexibility to accommodate our partners' needs. In fact, our facility is suited for both small- and large-scale production.

## CONSULTANCY

We work side by side with our partners, helping them accomplish their projects

We work side by side with our partners through every step: research and development, production, analysis, and registration with the competent authorities. Our goal is for our partners to go through the whole process with ease and confidence.

## REGULATORY ASSISTANCE

Do you want to register your product in Italy or abroad? Let us help!

We assist our clients who want to register their product with Italian and foreign authorities. We provide the required certifications and can also be your direct contact with the regulatory bodies. Moreover, we deal with the management of databases and the allocation of barcodes.

## WE LISTEN TO YOUR NEEDS

To every problem there is a solution, those who do not think so just haven't worked with us yet!

More than 35 years of experience and a diverse and dynamic team are our solution to every problem, whether technical or administrative. We always search for the solution that will suit you best.

# Our products

Food supplements, Probiotics, Cosmetics, Medical devices, veterinary and homeopathic products. We adopt the highest standards and technologies for production and raw materials and end-product analysis.

## QUALITY CONTROL

Our facility is provided with a quality assurance laboratory, equipped to analyse both raw materials and finished goods, a service we also provide to third parties. Microbiological studies, environmental quality and water quality controls are carried out as well.

## FOOD SUPPLEMENTS

Tablets: traditional, modified-release, coated, double/triple coating or chewable; Capsules: traditional, vegetable, acid resistant or microgranules-filled; oral solutions, gels, and powders. Behind these products is a thorough research and analysis of raw materials' safety and characteristics. We regularly review the scientific literature and our suppliers.

## MEDICAL DEVICES

Vaginal suppositories, Rectal suppositories, Vaginal douches, Sterile and injectable vials, Single-dose vials, Mouth/nose sprays, Oral solutions. All our products can be modified according to your needs, both in content and packaging. We offer our assistance for medical devices in compliance with EU Regulation 2017/745. Furthermore, we have obtained the certification UNI CEI EN ISO 13485:2016.

## PROBIOTICS

Probiotics require particular care, which is why we decided to dedicate them an entire production and packaging facility, featuring a cold chain and necessary differential pressures. One of our top-notch packaging is the single dose stick pack, which allows the preservation of the lactic ferment titration. The vitality of the individual bacterial strains is also guaranteed by the nitrogen insufflation occurring during the sealing of the stick pack.

## HOMEOPATHIC PRODUCTS

Manufacturing homeopathic products and finding the suitable raw materials requires a strict compliance to EU regulations and to specific pharmacopeia monographs. Alfa Omega can guarantee the best quality during all steps of its supply chain - from raw materials selection to end-products - and is one of the few Italian companies to be fully "self-sufficient" production-wise, as it is equipped with all the necessary manufacturing authorisations and all the different homeopathic strains.

## COSMETICS

Creams and gels for body and face care, slimming and reshaping, for microcirculation. Alfa Omega manufactures each product in line with the customer's needs. All products are available with various packaging options: tube, airless bottle, packet, and stick pack. Additionally, we offer regulatory assistance to our clients in order to guide them during the product's registration process.

## Our goals

We believe that in order to effectively meet our clients' needs, our company has to steadily work on improving the organisation and efficiency of its management and production processes. We believe that a successful company can lead to successful clients, and we aim at swiftly and reliably accommodating your needs. Any project can become extraordinary, and Alfa Omega is looking forward to being part of building such project.

We put our passion, expertise, and attention to quality in everything we do, from the design to the creation of new products for the health and wellbeing of people.

# Quality

Quality is one of the fundamental pillars of Alfa Omega's vision. The company is certified by AIFA as GMP compliant manufacturer. Furthermore, the company has obtained the UNI EN ISO 9001: 2015 certification, confirming the elevated quality of the services, standards, and products supplied. The certification applies to the "Planning and Production also for third parties of food and diet supplements, medical devices, cosmetics, homeopathic products, and premixtures obtained using animal feed. Additionally, Alfa Omega has obtained the UNI CEI EN ISO 13485: 2016 certification for medical devices and Biogricert for organic products.
