Key elements to do business with us

Flexibility and ability to expand capacity modularly

- Ready to expand to new department areas
- High performance filling line already identified

Vertical Integration

- Biomedica is a partner able to cover the entire value chain from the API production the filling and packaging of the finished product and commercialization of pharmaceutical products relying on high quality standards and advanced technologies

Operation excellence

- Biomedica pursues a corporate policy aimed at a continuous and ambitious improvement that is achieved through a team of reliable and experienced managers as well as highly skilled workforce capable to handle development process and production of pharmaceutical products of both well established products and new projects implementation

Outstanding quality culture

- The plant is designed to ensure the highest quality production standards in accordance with the GMP (Good Manufacturing Practices) and operate in full compliance with the EU regulations

BIOMEDICA FOSCAMA S.p.A.
INDUSTRIA CHIMICO FARMACEUTICA

Key elements to do business with us

Solid Experience and Know-How in sterile products

- Expertise of professionals with consolidated experience in leading Pharma Companies National and Multinational.

Technology Transfer

- Cross functional team focused on coordinating Product transfer activities according to time and cost targets agreed with customers
- One single point of contact for customers that is constantly updated on the transfer progress

Plant Capabilities

Biomedica is authorized to manufacture sterile products and is primarily focused in the production for injection, either as lyophilized powder or ready-to-use solutions. Capabilities include:

- ☐ Sterile freeze drying
- ☐ Filling in sterile vials and ampoules (powders and liquids)
- ☐ Packaging of ampoules, vials

The site strives for quality and the highest efficiency for all process. Thanks to a long term entrepreneurial vision, that allowed the group to stay ahead of changes in the industry and invest in cutting edge solutions, Biomedica takes pride in having all the high-technological, high performance and outstanding quality equipment in place to fulfill our partners' requirements

Plant Capabilities

► Biomedica Foscama has been completely revamped

□ Present capacity:

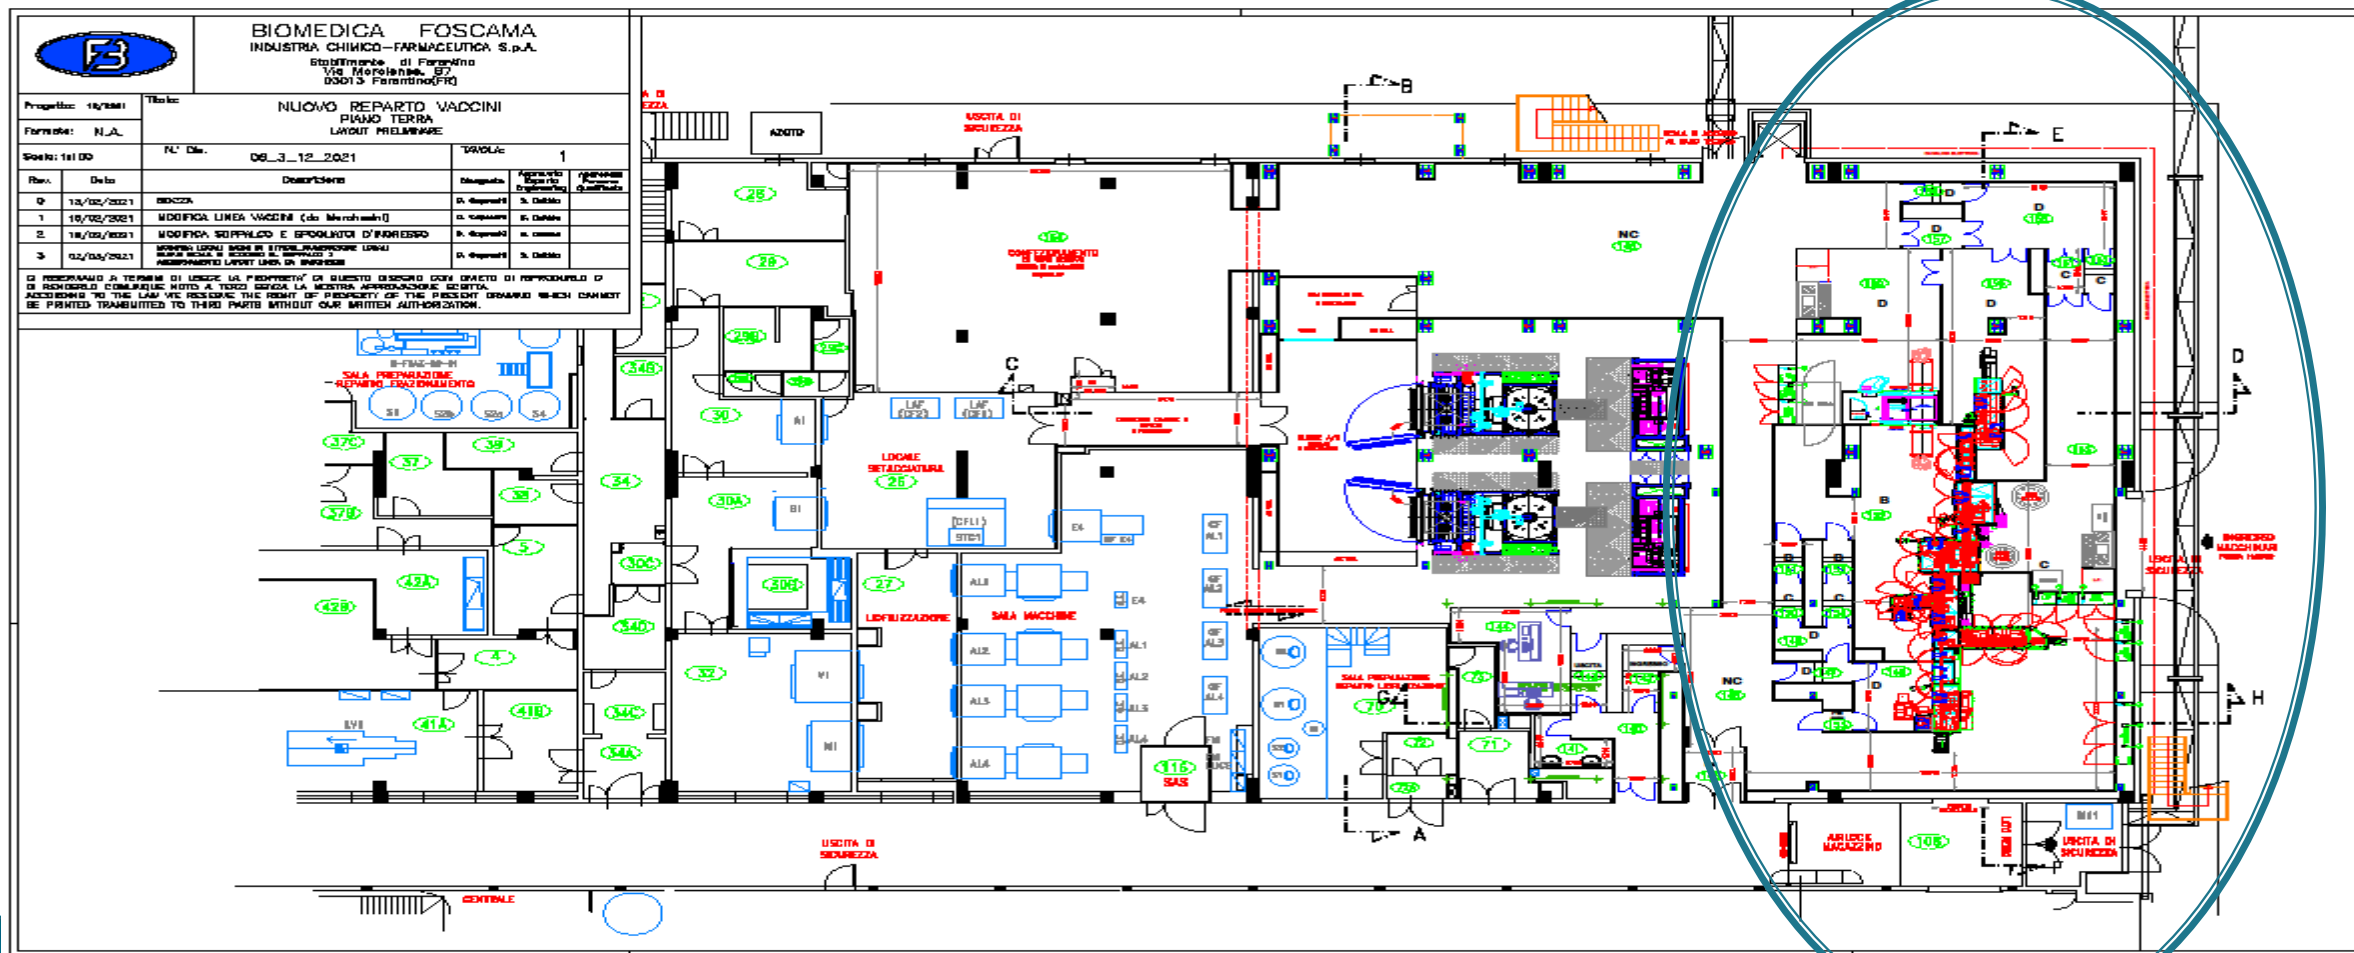

- ❖ API Lyophilization: 32.000kg
- ❖ Ampoules: 100 mio ampoules
- ❖ Vials: 40 mio vials

□ Future:

- ❖ Vaccine area: capacity 80 mio vials/year and 160 mio pre-filled syringes

New vaccine area in progress

BIOMEDICA FOSCAMA S.p.A.
INDUSTRIA CHIMICO FARMACEUTICA

New Vaccine area

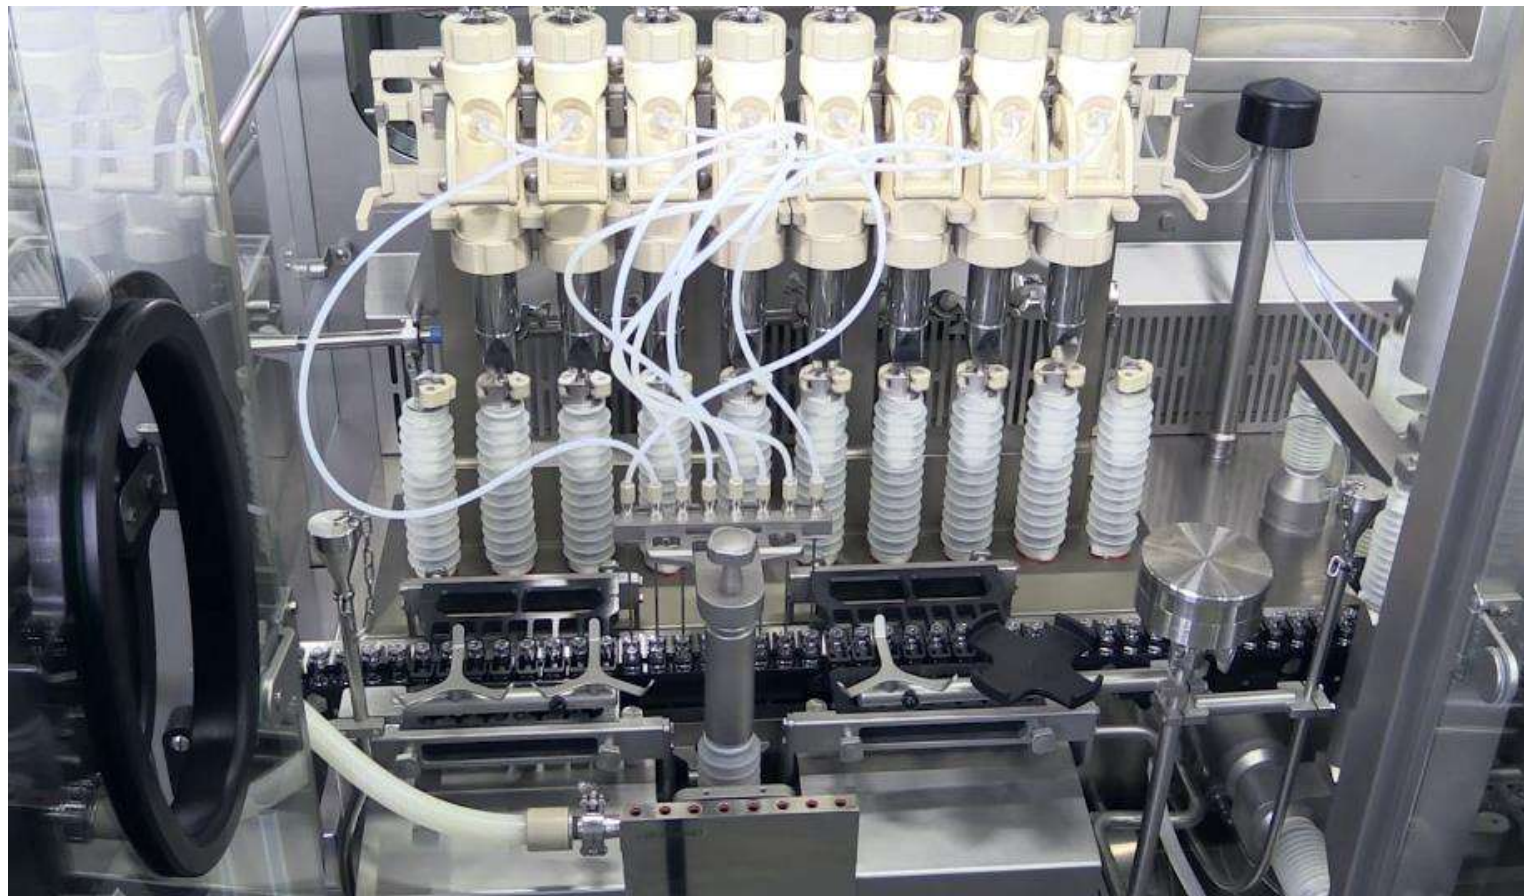

- ❑ Biomedica Foscama has the capabilities to fill in vaccine with all technologies (including m-RNA).
- ❑ Department biosafety level 2 (according to WHO Collaborating Center for clinical care, diagnosis, response and training on Highly Infectious Diseases)
- ❑ Partnership with ACS Dobfar for the production of bulk

Our main strength

- ▶ High performance robotic filling machine completely automated
- ▶ Vaccines annual capacity: 80 million vials or 160 million pre-filled syringes
- ▶ Extensive available area to maintain vaccines cold chain
- ▶ Location: very close to Industrial area of Anagni and motorway

OUR VALUE ADDED

- ▶ Outstanding quality standard
 - ▶ Flexibility– Professionals with strong skills and experience in Sterile process–Technology Transfer Team
- 

THANK YOU FOR YOUR KIND ATTENTION
