First patent
in the Central
Nervous System
area

2012

First major
distribution
in an extra-UE
country

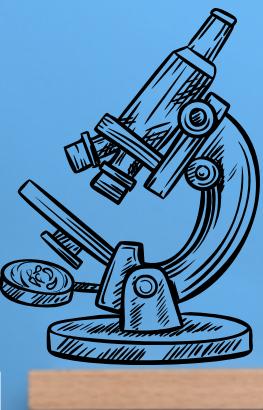

2021

Launch of the
internationalization
campaign

WHAT MAKES US DIFFERENT:

We believe that people's wellness is achievable in simpler ways by taking small steps every day.

We bring ideas to market with a scientific approach from rational design to the market going through formulations, clinical studies, efficacy, claims, patents, publications and production. Every single step needs care, dedication and quality.

We believe in natural products with a clinically proven efficacy.

We love to research new challenges, we strive to solve problems with innovative solutions.

We enjoy enabling pharmaceutical companies of any size to bring their ideas into reality by providing all the scientific, regulatory and production support necessary.

PRODUCTS

CorCon International is presenting an exciting portfolio of finished products that may be useful in completing your line of products or in opening new ones. All products have been designed, formulated, tested in clinical studies and where possible published and patented

CENTRAL NERVOUS SYSTEM

promoting the normal function of the nervous system, protecting the cells from oxidative stress and promoting the normal homocysteine metabolism.

1

CARDIOVASCULAR

promoting the maintenance of normal blood cholesterol levels, protecting the cells from oxidative stress and promoting the normal collagen formation for the normal function of blood vessels.

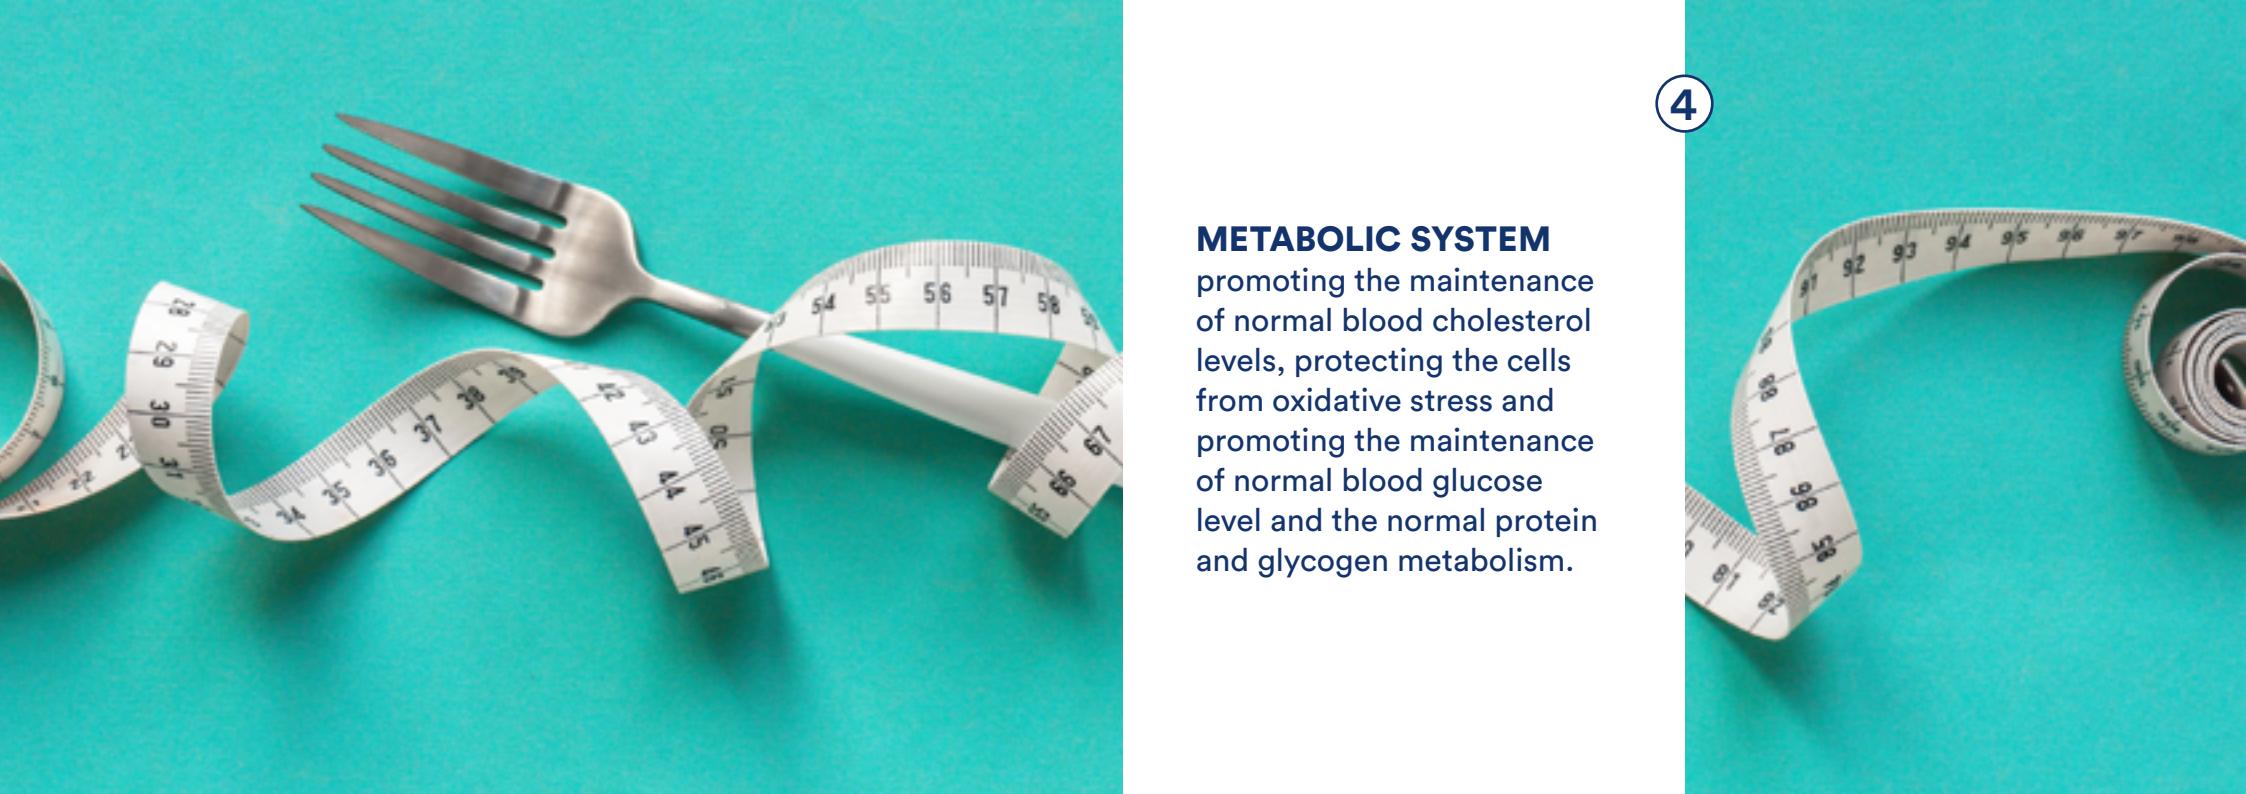

2

3

IMMUNE SYSTEM

promoting the normal function of the immune system and protecting cells from oxidative stress.

4

METABOLIC SYSTEM

promoting the maintenance of normal blood cholesterol levels, protecting the cells from oxidative stress and promoting the maintenance of normal blood glucose level and the normal protein and glycogen metabolism.

6

GYNECOLOGY

protecting the cells from oxidative stress, contributing to normal absorption and utilisation of calcium and phosphorus and to the maintenance of normal bones.

5

ORAL CAVITY

protecting cells from oxidative stress, contributing to normal collagen formation for the normal function of gums and teeth.

CONSUMER HEALTHCARE
promoting the maintenance of a proper wellness condition through products for pharmacies and large retailers that satisfy common needs, are easily accessible, and their clinical effects are reliably and smoothly documented.

COSMECEUTICS
addressing skin aging problems, providing support to the specific needs of the skin with effective actions on epidermis, vessels and cells of dermis

SERVICES

CorCon International helps pharmaceutical companies in bringing to market innovative products for improving and maintaining people's health.

We analyze existing wellness and health problems to find new ways to approach and solve them. We design new formulations, improve existing ones or close pending ideas. Our goal is to offer you an original, innovative and tailored set of solutions.

**RATIONAL
DESIGN &
FORMULATION**

**CLINICAL
STUDIES**

We design clinical studies in order to evaluate the efficacy and safety in vivo of your formulations. We collaborate with universities, hospitals and private laboratories in Italy and Europe. Our goal is to provide convincing evidence that your product works as intended and will have lasting success on the market.

We believe patents may help your products emerge and live longer in the markets and we directly support the drafting of patent applications (i.e. State of the Art, Description of the Invention and Examples). We support in drafting replies to questions from the Examiners. Our goal is to simplify the long patenting process to protect your products.

We analyze your clinical data in order to draft brilliant manuscripts for publication in international scientific papers. We support the selection of interesting journals and we address questions from peer-reviewers. Our goal is to convince the scientific community of the importance and relevance of your product.

We identify the best qualified and certified manufacturers for your product and we support you in choosing the best form and package for it. We take care of all the production and regulatory steps. Our goal is for you to focus on marketing and selling a finished and competitive product.

ADDITIONAL VALUES TO YOU
