Value Proposition

- ❖ A specialized technology company that is fully integrated at each stage of production - from the starting raw material to the finished product
- ❖ Consolidate demand on a global scale and place orders in bulk with our local and international supply chain partners
- ❖ Create beneficial outcomes for both manufacturers and end users

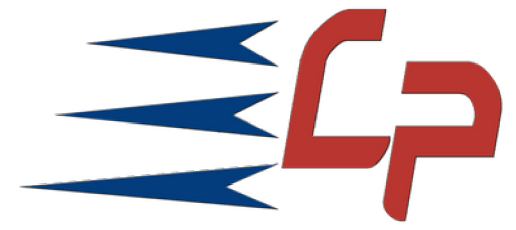

Strengths

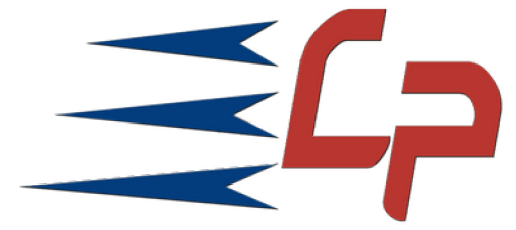

- ❖ Produce our own key starting materials and intermediates, which are supplied to > 250 local and foreign manufacturers
- ❖ Possess critical purification technologies developed to reduce or eliminate isomer formation
- ❖ Conduct efficient in-process controls at various stages at the production level to ensure consistency in quality compliance
- ❖ Possess state-of-the-art solvent recovery and purification systems to enhance quality wherever possible

Strengths

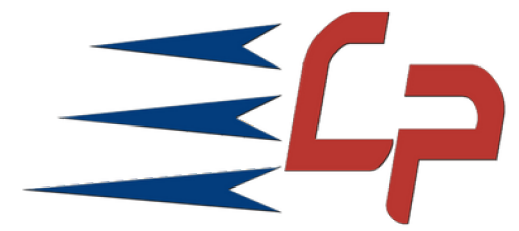

- ❖ Stay competitive by supplying partners with raw materials and process technology in exchange for finished products
- ❖ Monitor and optimise raw material and process costs to ensure frugal, efficient and green innovation
- ❖ Tie up with producers on an exclusive contract manufacturing basis to scale up production capacities and operations
- ❖ Pass on savings to our clients with additional value-added services such as credit payment terms, just-in-time inventory, etc.

Goals

- ❖ Committed to increasing profitability for all customers
- ❖ Dedicated to raising company turnover by 15% each year
- ❖ Devoted to regularly empowering all employees, suppliers, and clients
- ❖ Driven to add new molecules and diversify our offerings annually
- ❖ Persevere for 100% product acceptance and customer satisfaction
